DENTISTRY

INTRODUCTION^a

Independent dental schools

From the earliest times dentistry was practised as a branch of surgery. Herodotus speaks of means of preserving the teeth, and artificial teeth are alluded to by Greek and Latin poets. Within the last half century dentistry has become a distinct profession. John Greenwood who carved in ivory a set of teeth for George Washington is said to have been the first American to establish himself as a dentist. His office was in New York and the work for Gen. Washington was done in 1790 and in 1795.

The Baltimore college of dental surgery, established in 1839, was the first institution of the kind in the world. It was the direct result of an agitation to put dentists on a higher professional plane, and followed an unsuccessful attempt to found dental chairs in medical schools. It had been argued that oral pathology and dental mechanics should be taught in the medical schools as branches of medicine and that graduates choosing these courses should receive the degree of M. D. as in the case of

^aSee Shepard's Inaugural address at the World's Columbian dental congress.

other branches of medicine.^a In the same year, the *American journal of dental science*, the first dental periodical in the world, was established.

In 1845, the Ohio college of dental surgery (since 1888 the dental department of the University of Cincinnati), in 1856, the Pennsylvania college of dental surgery, in 1863, the Philadelphia dental college were founded. These separate schools taught at first very little medicine but paid attention almost entirely to mechanical training and to those branches which a dentist must know. All conferred the degree D. D. S. In 1865 the New York college of dentistry was founded with the purpose of educating men to practise dental surgery as a specialty of medicine. The curriculum included the fundamental departments of medicine with operative dentistry and oral prosthetics.

Dental departments

In 1867 Harvard university opened a dental department and began to teach dentistry as a branch of medicine with the special degree D.M.D. (Dentariæ medicinæ doctor). In 1875 the University of Michigan and in 1878 the University of Pennsylvania followed the example of Harvard in opening dental departments. 36 of the 56 dental schools are now departments of other institutions.

Growth

Since 1878 there has been a most astonishing increase in dental schools and dental students, due largely to the fact that the dental laws in many states now require graduation from a dental school as a condition for license. In 1878 there were 12 schools and 701 students; in 1899 there were 56 schools and 7633 students. The growth in dental students in 21 years has been 988%. Of the 56 dental schools now existing in the United States, 2 were established between 1826 and 1850, 7 between 1851 and 1875, 47 between 1876 and 1900.

47 dental schools hold day sessions, 4 evening sessions, and 5 do not report this item. Degrees are granted to graduates of all schools.^b

Discoveries and inventions

The discovery of the anæsthetic power of drugs, the most important step in the progress of medicine, was made by an Ameri-

^aDr William Carr of New York writes substantially as follows: Dentistry should be recognized as a specialty of medicine, and the dentist should hold a degree in medicine. The education of a physician is as necessary to one who undertakes the treatment of lesions, maladies and defects within the oral cavity as to one whose treatment is confined to the tracts of the nose, the ear and the throat.

^bGraduates of the New York dental school receive degrees through the University of the State of New York which also countersigns the degrees of the New York college of dentistry.

can dentist William Jennings Morton, though the honor of this discovery is shared with another dentist Charles W. Wells of Hartford, Ct. who in 1844 rendered the extraction of teeth painless by the use of nitrous oxid. In his *History of European morals* Lecky says: "It is probable that the American inventor of the first anesthetic has done more for the real happiness of mankind than all the philosophers from Socrates to Mill."

Between 1850 and 1860, the use of crystal gold and the discovery of the cohesiveness of freshly annealed foil opened a new field for operative dentistry. The next decade witnessed the introduction of such improved instruments as the mallet, the rubber dam and the engine. The invention of the modern artificial crown and the bridge is another important event of about this period. In the 20 years just preceding 1893 more than one hundred different crowns and bridges are said to have been invented.

Dental societies

In 1840 the American society of dental surgeons, the pioneer of the associations to which dentistry owes so much of its progress, was organized in New York.

The National association of dental faculties, organized in 1884, has done much to strengthen courses of study in dental schools. At the time of its organization only those schools were admitted which had proper facilities for instruction and a corps of competent teachers. From time to time standards have been raised by rules governing attendance, instruction and graduation. There are at present 47 schools in the association, all of which require three full courses of dental lectures. The main defect of these schools as a rule is failure to require a sufficient preliminary general education for admission. The efforts of the association in this direction have not accomplished much as yet.

The National association of dental examiners,^a organized in 1883 to secure higher and more uniform standards for admission to dental practice voted in 1898 to refuse recognition to any dental school that did not have, 1) entrance requirements equivalent to at least two years of high school work, 2) attendance on three courses of lectures of at least six months each in different years as a condition for graduation, 3) a faculty of at least six, 4) a course of study embracing operative dentistry, dental pathology, dental prosthetics, oral surgery, anatomy, physiology, general

^aAt its July 1899 meeting this association created an advisory committee to promote uniformity in administering dental laws. Dr H. J. Allen, secretary of the committee, writes November 15, 1899, for "a comprehensive report from the New York examiners, as the entire committee regards the New York dental law as the best in the country." Dr Allen states that boards in about 15 states have agreed to enter this compact to secure uniform standards.

pathology, materia medica, therapeutics and general surgery, 5) suitable chemical and bacteriologic laboratories under competent instructors, 6) suitable lecture rooms, a well-appointed dental infirmary and a general prosthetic laboratory. These rules were not approved by the National association of dental faculties and efforts to enforce them proved unsuccessful.^a

A joint meeting of committees of these two national associations was held at Niagara Falls in 1899, and it is probable that both will now work harmoniously toward higher standards, the progress to be made by degrees. The committees agreed on one year of high school work as the minimum requirement for admission to dental schools and by vesting the determination of this requirement in the hands of state superintendents of education they recognized the importance of removing this power from those who might exercise it unwisely through a desire to attract students. The motion of Dr Barrett to extend the requirement to two years of high school work after the session of 1901-2 is to be acted on at the 1900 meeting of the National association of dental faculties. Other requirements of this association, as printed in the new rules, are the same as those given above under the National association of dental examiners except that each course of lectures is to be seven months in duration and general surgery is not mentioned as a special topic.

Subjects discussed

Among the subjects which have attracted much attention recently in dental literature and dental societies are the increasing use of plastics and of porcelain, the modification in practice through laboratory investigation, the germ theory of disease, antiseptics, the uses of electricity and the tendency of prophylaxis to develop along physiologic lines by attention to the laws of health. Among important topics discussed by the National association of dental faculties, the undue multiplication of dental schools without proper facilities, and detrimental effects of scholarships have been prominent.^b

The question of interchange of licenses has been discussed frequently during the last few years. The correspondent of the New York state dental society at the May 1899 meeting submitted a proposition that all state boards, members of the Na-

^aIn 19 political divisions the latest prescribed preliminary and professional requirements are those of the National association of dental examiners, in 4 political divisions those of the National association of dental faculties. Differences between these associations having been adjusted their requirements will probably become uniform.

^bThis association voted Aug. 1, 1899, that no school in the association should grant free or beneficiary scholarships not absolutely obligatory under charter provisions.

tional association of dental examiners, use identical question papers prepared by a committee of the national body, and that licenses granted as a result of such examinations be interchangeable among the states represented in the National association. This scheme had been submitted to dental examiners throughout the country and had been approved by most of those from whom replies had been received.

Interchange of licenses is highly desirable and will doubtless be brought about to some extent in the near future. An examination, however, should not be made the only test. A reasonable preliminary general education and a diploma from an accredited school should be required for admission to the final test which should be both theoretic and practical, and should be carefully guarded from danger of fraud or indirection.

An important step toward interchange of licenses was taken in 1898 when the New York dental law was amended so that the regents may now issue their license to any applicant who holds a license to practise dentistry granted by a state board of dental examiners, indorsed by the dental society of the state of New York, provided that his preliminary and professional education meets the New York statutory requirements. The dental examiners of New Jersey and Pennsylvania having been indorsed by the New York state dental society as more nearly approximating the New York standard than any other state boards, the New York state dental examiners, at a meeting held Oct. 7, 1899, recommended to the regents the indorsement of New Jersey and Pennsylvania licenses granted under the new régime, provided the preliminary and professional education of applicants meets the New York statutory requirements. The regents will probably act favorably on the recommendation if the New Jersey and Pennsylvania boards agree to establish a standard in preliminary general education fully equal to that required by the New York law.^a

^aThe New Jersey statute demands "a preliminary education equal to that furnished by the common schools." The secretary of the New Jersey dental commission writes Oct. 17, 1899, that this has been construed to mean graduation from a registered four years' high school course. "We have, however, agreed to require only a three years' high school course up to Jan. 1, 1901, when the full requirement shall take effect simultaneously with New York. This agreement is made with the full knowledge and approval of the governor and the superintendent of public instruction and you may rest assured that New Jersey will live up to the spirit as well as the letter of the agreement . . . We look on the interchange of licenses with New York as the greatest educational advance that has yet been made in the dental profession, the formation of a nucleus around which all other states must rally." Dec. 21, 1899 the regents acted favorably on the recommendation as regards New Jersey but deferred action in the case of Pennsylvania.

Legislation

In Alabama in 1841, the first state law regulating the practice of dentistry was enacted. This was probably the first dental legislation in any country. The next state to pass a dental law was New York, but this action was not taken till 1868. The English law was enacted in 1878, and those of other countries about that time or later.

The practice of dentistry is now regulated by statute in almost all political divisions of the United States.

ASSOCIATIONS^a

While the matter of licensing dentists belongs to the several states and is not a national prerogative, there are certain associations of a national character that have greatly influenced and brought into closer uniformity the laws, rules, and regulations, professional and preliminary requirements for admission to the study and practice of dentistry.

National association of dental examiners, L. Ashley Faught, D.D.S., secretary to the committee on colleges, 2055 p. o. box, Philadelphia, Pa.

Organized 1883, incorporated at Washington, D. C., 1896, and meets annually.

Object. Its object is to secure through the operation of the various state examining boards, a high and uniform standard of qualification for dental practitioners, and so far as practicable, uniformity of methods in the working of the boards and of legislation in creating them. Membership consists of such state boards of dental examiners as may elect to join it. These boards are represented by delegates to the National association of dental examiners. The representatives of 10 state boards constitute a quorum for transaction of business. The work of the association is intrusted principally to a committee known as the committee on colleges. This committee keeps itself fully informed of the teaching ability and condition of all the dental schools in the United States, and of all the workings of the several boards, and furnishes data and information to the boards in membership. On July 29, 1899, the association created a committee of three entitled state board's advisory committee with duties as follows: 1) to formulate a general plan of conducting board work, the plan to include every detail of testing the fitness of candidates for license, e. g. uniform applications, questions, practical demonstrations, markings, standings and time of examinations; 2) to secure the acceptance of the plan by other boards; 3) to report annually to the association; 4) to induce boards that may not lawfully accept the general plan to work on a plan corresponding in principle with it. About 15 boards agreed to enter the compact, and H. J. Allen, 421 H st. N.E., Washington, D. C., is secretary of the advisory committee.

Extracts from rules adopted Oct. 14, 1898 as amended July 1899
1) Schools desiring recommendation to the state boards by the National association shall make application for such recommendation through the committee on colleges, on blanks provided for that purpose. 2) schools,

^aThese two associations not always harmonious in the past are now working together (see p. 752).

to be recommended by the association, shall require of students applying to them for matriculation, written entrance examinations in the following studies:

English grammar, composition, spelling, punctuation, grammatical construction; descriptive and physical geography, U. S. and general history; advanced arithmetic, algebra through quadratics, plane geometry; Latin, rules of grammar, declensions, conjugations, construction, translation of easy prose; elementary physics.

The candidate to make a general average of at least 75%. In lieu of this examination, a certificate of graduation from a high school, college, or university, or an entrance certificate to the freshman class of a college or university, may be accepted. The institutions, however, granting these certificates are to be accredited as standard by the communities within which they are located. This rule is to become operative at the beginning of the session of 1899-1900. In admitting students, who have taken a partial course in other schools, to advanced standing—junior or senior classes—schools to be recommended shall require evidence from such students that their first matriculation was in accordance with the requirements under this rule governing the entrance examination. 3) The statements set forth in the application of any school for recommendation shall be verified after investigation by the board of dental examiners of the state in which the school is located, or by other persons, designated by the national association in case no such state board exists; and the commendation of such board shall be essential to such action. 4) The state boards in connection with the association are required to become informed of the character of the dental schools located in their respective states, as to their equipment, facilities and methods of teaching, and to report annually to the association wherein they fail to comply with the requirements. 5) Attendance of students on three full courses of not less than six months duration each, in separate school years, is required before final examination for graduation. 6) Each dental school desiring recommendation must have a teaching faculty composed of at least six individuals and teaching the following branches: operative dentistry, dental pathology and prosthetics, oral surgery, anatomy, physiology, general pathology (fundamentals), materia medica and therapeutics, and general surgery. Its students must also be taught the subjects of chemistry and bacteriology in laboratories adapted to the purpose, and under suitable instructors; must possess, in addition, suitable lecture rooms, a well appointed dental infirmary, and a general prosthetic laboratory, and must furnish in them systematic instruction to its students. 7) All recommended schools must maintain these rules and conditions and any violation of them will cancel recommendation. It is considered inadvisable for a member of an examining board to be connected with a dental school in any capacity whatever and it is suggested that each school conforming to these rules state so specifically and publish in its annual announcement the actual preliminary requirements contained in 2. 8) Schools desiring recommendation shall make application through the committee on colleges, on blanks provided for that purpose. This rule applies only to new schools and such schools as may be dropped. The minimum preliminary educational requirements of the schools of this association for the session of 1900 and 1901 are a certificate of entrance into the second year

of a high school, or its equivalent, the preliminary examination to be placed in the hands of the state superintendent of public instruction. All schools having membership in the National association of dental faculties are placed on the list of recognized schools.

Recognition, physical geography 2, U. S. history 2, general history 2, algebra 4, plane geometry 4, Latin 4, physics 2, total 20 counts.

National association of dental faculties, J. H. Kennerly, secretary, 905 Chemical bldg. St. Louis, Mo.

Organized 1884. The object is to promote the interests of dental education. The officers and three members constitute an executive committee with power to designate time, place, preparation for meetings and to pass on all credentials. On recommendation of the executive committee and a two-thirds vote of the association any dental school becomes entitled to representation by signing the constitution, conforming to the rules and regulations and paying the assessments.

A standing committee of five is appointed each year, called the committee on foreign relations, whose duty it is to report each year the relative status of dentistry in America and Europe. It is given jurisdiction in all foreign and American dental educational matters, subject always to the approval of the National association of dental faculties, to which a full written report is submitted annually. An advisory board of not more than three qualified persons each from 1) Great Britain, 2) Holland and Belgium, 3) Denmark, Norway and Sweden, 4) Russia, 5) Germany, 6) Austria and Hungary, 7) Italy and Greece, 8) France, 9) Spain and Portugal, 10) Switzerland and Turkey, is appointed to which the papers of any foreign applicant for membership in any American dental school may be referred for verification or indorsement, and the papers are referred to the member of the advisory board for the country of which the applicant is a resident.

Extracts from rules regulating the admission of students for the session of 1899-1900: 1) The minimum preliminary educational requirement is a certificate of entrance to the second year of a high school or its equivalent as determined by state authority 2) Credit can not be given for a full course to students admitted later than 10 days after the opening as published in the announcement 3) Schools may receive to advanced classes only such students as hold certificates of having passed examinations in the studies of the lower classes. 4) Certificates must be issued within 30 days after the examinations, must be verified by the dean on application, must be presented for admission to the advanced grade and students from foreign countries must furnish properly attested evidence of study, attendance on lectures, and examinations. 5) Admission to the second year may be granted to the graduate of a reputable medical school who may be excused from lectures and examinations in general anatomy, chemistry, physiology, materia medica and therapeutics;

to the undergraduate of a reputable medical school that has completed a full scholastic year and passed a satisfactory examination in the first year; to the graduate of a registered school of pharmacy or of veterinary medicine. 6) Attendance on three full courses, of not less than seven months, or on four terms of six months each in separate years Aug 1 to July 31, are required before examination for graduation. Examinations in the English language only. 7) A student suspended or expelled for cause can not be received by any other school the same session and a student can not receive credit at any time for the course from which expelled. Notice of suspension must be sent to all schools of the association. 8) No degree shall be conferred as honorary that is usually granted in due course of study and examination. 9) Time and study in dental schools not members of the association receive no recognition. 10) Courses of study must be graded and followed by examinations.

STATUTES

Under this title are the laws or their equivalents governing the admission to the practice of dentistry in each political division of the United States revised to the latest practicable moment, and arranged alphabetically. For convenience of reference certain facts from the most reliable and recent sources of information are uniformly given in connection with each political division.

Geographic information, 1) location, 2) area, 3) population.

Legislative information, 4) title of the law-making body, 5) frequency of its sessions, 6) time of next meeting, 7) place, 8) date of the last statute or amendment published, 9) date of the last statute consulted.

In editing and revising the statutes care has been taken to omit all irrelevant matter and all inoperative by reason of time limit or amendments, to preserve the phraseology and punctuation and to give the sources of information. Minor changes involving paragraphing, numbering, capitalization and spelling have been made in accord with the editing rules of the University when the change affected the significance of the law in no particular. Volume and page numbers are separated by a colon; e. g. 1:256 means vol. 1, p. 256. For convenience side heads are inserted when not given in the law.

An appeal may be taken from the action of the board to the circuit or superior court of the county in which the certificate was refused or revoked by the board, upon the applicant giving a good and satisfactory bond in the sum of \$200, to be approved by the court, to secure the costs of such appeal should the appeal be determined against him.

§ 21 **Prosecuting officer.** It shall be the duty of the attorney general and of the prosecuting attorney of the court to which an appeal from any action of the board may be taken to represent the board in any such appeal; and in case such board shall be sustained upon appeal, a fee of \$20 shall be taxed as a part of the costs of the appeal in favor of the prosecuting attorney.

§ 22 **Act construed.** This act shall not apply to any commissioned officer of the United States army, navy or marine hospital service in the discharge of his official duties, nor to any dentist who is legally qualified to practise in the state or territory in which he resides, when in actual consultation with a local practitioner of this state; nor to any dentist residing on the border of a neighboring state and duly authorized to practise dentistry under the laws thereof, whose practice extends into the borders of this state: provided that such practitioner shall not open an office or appoint a place to meet patients or solicit practice within the limits of this state.

§ 25 **Temporary permit.** Any three members of the board may grant a permit to practise dentistry to any person who shall possess a diploma or who shall have attended not less than two years at a reputable dental college recognized by the board and who shall file with the secretary of the board his application therefor, but such permit shall by its terms be limited to some specified period of time, not to exceed a year, and no second permit shall be granted to the same person.

§ 26 **Temporary license granted thereon.** The holder of a permit shall not be authorized to practise dentistry thereon until the same has been presented to the clerk of the circuit court of the county in which said applicant proposes to practise and a temporary license shall have been issued thereon, which license shall show upon its face the time of the expiration of the authority given by the board to practise dentistry, for which license the same fee shall be paid as for other dental licenses. Nor shall any permit authorize the issuance of a license which does not on its face show the time at which it expires.

§ 27 **Penalty.** Any person who shall practise dentistry in this state without having a license duly issued as hereinbefore provided shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not less than \$25 nor more than \$200

It shall organize by the selection of one of its members as president and one as secretary and treasurer, and meet at least once in each year and oftener, as may be necessary, at such times and places as it may select, and a majority shall constitute a quorum, such meetings at all reasonable times shall be open to the public. It shall at any regular meeting examine each applicant touching his knowledge and skill in dental surgery, and, if found qualified to practise dentistry, issue a license therefor; a like license shall be issued without an examination, upon the payment of a fee of \$2, to any graduate of a reputable dental school or department of a college or university, or to those who have been in practice of dentistry in this state for six years. The license shall be signed by each member of the board, attested by the president and secretary, and, when thus signed and attested, shall be presumptive evidence of the right of the holder to practise in this state. Each applicant for examination shall pay a fee of \$10, and, out of any funds received by the board as authorized in this chapter, each member shall receive the sum of \$5 for each day he is actually engaged in the duties of his office. Any one who desires to continue the practice of dentistry shall, on or before May 15 of each year, pay to the board of examiners the sum of \$1 for which he shall receive a renewal of his certificate, unless his name has been stricken from the register for violation of law. Any person continuing to practise dentistry who shall fail or neglect to procure his annual renewal of registration shall, for each such offense, be liable to a fine of \$10 for each calendar month during which he is so delinquent; but in no event shall any compensation or expenses be paid from any other source. Any sum remaining after the payment of such compensation and expenses shall be paid into the state treasury on or before the first day of August of each year, by the treasurer, who shall, on assuming his office, file with the secretary of state a good and sufficient bond in the penal sum of \$1000. The board shall make report biennially to the governor of its proceedings, with an account of all money received or disbursed. [*As amended 1898, ch.* 71]

§ 2598 Temporary license. Each member of the board may issue a temporary license to practise dentistry, upon the presentation of proper evidence of the qualifications required, which shall remain in force until the adjournment of the next regular meeting of the board occurring thereafter.

§ 2599 License required; registration. No person shall engage in the practice of dentistry without a license from the board of examiners, as above required, except those who are registered practitioners of dentistry under laws heretofore in force, but this shall not be so construed as to prevent licensed or registered physicians and surgeons extracting teeth. Each person so licensed shall, before engaging in the practice in any county in the state, cause his license to be registered in the office of the clerk of the district court of such county, for which the clerk may charge 25 cents. A failure to so register for six months shall work a forfeiture of the license, which shall not be restored by the board except upon payment to it of the sum of \$25 as penalty therefor.

§ 2600 Penalty. Any person who shall violate any of the provisions of this chapter shall be punished by a fine not exceeding \$200, or imprisonment in the county jail not exceeding 40 days.

§ 641 Board of examiners; term. A board of examiners to consist of five resident practising dentists is hereby created whose duty it shall be to carry out the purposes and enforce the provisions of this act. It shall be the duty of said Minnesota state dental association after Sep. 1, 1889, annually prior to Aug. 10, to present to the governor the names

of twice as many practising dentists resident in this state as there are regular members to be appointed of said board prior to Sep. 1, in the following year. All appointments by the governor shall be made within 20 days of the submission of such names to him, and if such names shall not be submitted to him within the allotted time, he shall make his appointments within 20 days from the expiration of the time allotted for such presentation of names from among the resident practising dentists. Provided that [nothing] in this act shall prevent the appointment of two members of said board from among the resident practising dentists not members of said Minnesota state dental association, if the governor shall so elect.

§ 642 **Organization; meetings.** Said board shall choose, at its first regular meeting annually, one of its members president and one secretary thereof, who severally shall have the power, during their term of office, to administer oaths and take affidavits, certifying thereto under their hand and the seal of the said board. § 644 **Duties at first meeting.** It shall be the duty of the first board hereinafter provided for to meet at the city of Duluth, in said state, on the second Tuesday in July, 1889, and elect officers, and within 10 days thereafter to transfer to a register to be provided by them for that purpose, the name, residence and place of business of each and every person who, on the second Wednesday in July, 1889, and pursuant to an act of the legislature of the state of Minnesota, approved Mar. 3, 1885, shall be qualified to practise dentistry in the state of Minnesota, and who shall then be duly registered on the books of the board created by said act of Mar. 3, 1885. No certificates of license to practise dentistry shall be issued after the second Wednesday in July, 1889, under said act of Mar. 3, 1885. It shall be the duty of the said secretary of the first board hereby created to send to each person as registered prior to Aug. 5, 1889, a certificate of his enregistration, signed by the president and secretary of such board of examiners.

§ 645 **How applicant must proceed.** Any person or persons who shall desire to begin the practice of dentistry in the state of Minnesota on and after Sep. 1, 1889, shall file his name together with an application for examination, with the secretary of the state board of dental examiners, and at the time of making such application shall pay to the secretary of said board a fee of \$10, and shall present himself at the first regular meeting thereafter of said board, to undergo examination before that body. In order to be eligible for such examination such person shall present to said board his diploma from some dental college in good standing, and shall give satisfactory evidence of his rightful possession of the same. ~~Provided~~, also, that the board may in its discretion admit to examination such other persons as shall give satisfactory evidence of having been engaged in the practice of dentistry 10 years prior to the date of passage of this act. Said board shall have the power to determine the good standing of any college or colleges from which such diplomas may have been granted. Said clerk shall record said certificate in a book to be provided by him for that purpose. Any person so licensed removing his residence from one county to another in this state before engaging in the practice of dentistry in such other county, shall obtain from the clerk of the district court of the county in which said certificate of registration is recorded a certified copy of such record, or else obtain a new certificate of registration from the board of examiners, and shall, before commencing practice in such county, file the same for record with the clerk of the court of the county to which he removes, and pay the clerk for recording the same the fee of 50 cents. name with intent to deceive the public, shall be liable to have said license revoked upon 20 days' notice of such proposed revocation, and of the time and place of considering such revocation by order of the state board of dental examiners. And any person who, after revocation of his license shall continue to practise dentistry in the state of Minnesota, shall be deemed guilty of a violation of the provisions of this act and shall be subject to the penalties provided therein. Nor shall a certificate to a person under one name be any defense to an action brought against him for practising without a certificate under another, unless it be shown that such practise under such other name was done without intent to defraud or deceive.

§ 648 **License fee.** Every registered dentist shall, in each and every year after 1889 pay to said board of examiners the sum of \$1 as a license fee for such year. Such payment shall be made prior to May 1 in each and every year, and in case of default in such payment by any person, his certificate may be revoked by the board of examiners upon 20 days' notice of the time and place of considering such revocation. But no license shall be revoked for such non-payment if the person so notified shall pay before or at such consideration his fee and such penalty as may be imposed by said board, provided, that said board may impose a penalty of \$5 and no more on any so notified as a condition of allowing his license to stand. Provided, further, that said board of examiners may collect any such dues by suit.

All moneys received in excess of said per diem allowance and mileage as above provided for shall be held by the secretary of said board as special fund for meeting expenses of said board and carrying out the provisions of this act, he giving such bond as the board shall from time to time direct. And said board shall make an annual report of the proceedings to the governor by the 15th of December of each year, which report shall contain an account of all moneys received and disbursed by them pursuant to this act.

§ 650 **Penalties for violation.** Any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction may be fined not less than \$20, nor more than \$100, or to be confined not less than one month, nor more than three months in the county jail, or both. And all fines thus received shall be paid into the common school fund of the county in which such conviction takes place.

§ 651 **Fraud.** Any person who shall knowingly or falsely claim or pretend to have or hold a certificate of enregistration, diploma or degree granted by a society or by said board, or who shall falsely and with the intent to deceive the public, claim or pretend to be a graduate from any incorporated dental college, not being such graduate, shall be deemed guilty of a misdemeanor, and shall be liable to the penalties provided in § 9 of this act.

Birdseye's Revised statutes 1896, 2:2460

§*160 **Definitions, as used in this article.** The terms University, regents and physicians, have respectively the meaning defined in art. 8 of this chapter. Board, where not otherwise limited, means the state board of dental examiners of the state of New York. Registered medical or dental school means a medical or dental school, college or department of a university, registered by the regents as maintaining a proper educational

standard and legally incorporated. Examiner, where not otherwise qualified, means a member of the board. State dental society, means the dental society of the state of New York. [*As amended 1898, c. 2, ch. 355, § 1*]

§ 160 **Licentiates.** Only the following persons shall be deemed licensed to practise dentistry: 1) those duly licensed and registered as dentists in this state prior to the first day of August, 1895, pursuant to the laws in force at the time of their license and registration; 2) those duly licensed and registered after the first day of August, 1895 pursuant to the provisions of this chapter.

§ 161 **State board of dental examiners.** On the first day of August, 1895, the state board of censors of the dental society of the state of New York, as the latter body shall be composed at the date of such appointment, shall become the state board of dental examiners. The existing division of said censors into four classes and their terms of office shall remain the same for the said board, except that said terms shall expire on the 31st day of July in each year. Before the day when the official terms of the members of any of said classes shall expire, the regents shall appoint their successors, to serve for the term of four years from said day. Such appointments shall be made from nominations in number twice the number of the outgoing class made by such society to the regents prior to the third Tuesday in May of each year. In default of such nominations, the regents shall appoint such examiners from the legally qualified dentists in the state belonging to the state dental society. The regents, in the same manner, shall also fill vacancies in the board that may occur. All nominations and appointments shall be so made that every vacancy in the board shall be filled by a resident of the same judicial district in which the last incumbent of the office resided. The board shall convene at the call of the secretary of the regents within not less than two weeks after appointment and organize by electing to serve for one year, a president and secretary. These officers shall be elected annually. No person shall be appointed an examiner unless he has received a dental degree from a body lawfully entitled to confer the same, and in good standing at the time of its conferment, and has been engaged within the state during not less than five years prior to his appointment in the actual and lawful practice of dentistry. Nor shall any person connected with a dental college as professor or instructor be eligible to such appointment. Cause being shown before them the regents may remove an examiner from office upon proven charges of inefficiency, incompetency, immorality or professional misconduct.

§ 162 **Examinations.** The regents shall admit to examination any candidate who pays the fee herein prescribed and submits satisfactory evidence, verified by oath if required, that he first, is more than 21 years of age; second, is of good moral character; third, has the general education required in all cases after Aug. 1, 1895, preliminary to receiving the degree of bachelor or doctor of medicine in this state; and either has been graduated in course, with a dental degree from a registered dental school,

or else, having been graduated in course from a registered medical school with the degree of doctor of medicine, has pursued thereafter a course of special study of dentistry for at least one year in a registered dental school, or holds a diploma or license conferring full right to practise dentistry in some foreign country and granted by some registered authority. Any member of the board may inquire of any applicant for examination concerning his qualifications and may take testimony of any one in regard thereto, under oath, which he is hereby empowered to administer. No degree in dentistry shall be conferred in this state till the candidate has satisfactorily completed a course of not less than three years in an institution registered by the regents of the University as maintaining proper dental standards, nor before the candidate has filed with the institution conferring it the certificate of the regents that three years before the date of the degree, he has either been graduated from a registered college or satisfactorily completed a full course in a registered academy or high school; or had a preliminary education considered and accepted by the regents as fully equivalent; or had passed regents examinations representing, for degrees conferred in 1898, one year of academic work, for degrees conferred in 1899, two years of academic work, and for degrees conferred in 1900 a full high school course. The regents may, in their discretion, accept as the equivalent for any part of the third or fourth requirement evidence of five or more years reputable practice, provided that such substitution be specified in the license.

Degrees. A person having lawfully received a dental degree in course from a registered dental school, or the degree of doctor of medicine from a registered medical school, and having thereafter lawfully practised dentistry for the term of five years, may apply to the regents for the degree of master of dental surgery, which degree the regents may confer after examination of the applicant by the board under such rules and regulations as the regents and the board shall frame. No degree in dentistry shall be conferred in this state on any candidate who has not before matriculation in the institution conferring it, filed the certificate of the regents that he has had a satisfactory preliminary education, which for those matriculating after Jan. 1, 1897, shall be not less than a full high school course.

Licenses. On certification by the board of dental examiners that a candidate has successfully passed the examination and is competent to practise dentistry, the regents shall issue to him their license so to practise pursuant to the rules established by them. Upon the recommendation of the board, the regents may also, without the examination hereinbefore provided for, issue their license to any applicant therefor who shall furnish proof satisfactory to them that he has been duly licensed to practise dentistry in any state or country after full compliance with the requirements of its dental laws, and has been thereafter lawfully and reputably engaged in such practice for five years next preceding his application; or who holds a license to practise dentistry in any other of the United

States granted by a state board of dental examiners, indorsed by the dental society of the state of New York, provided, that in either case his preliminary and professional education shall have been not less than that required in this state. The regents may also license any applicant on the certificate of the board that, after due investigation or examination, it finds his education and professional attainments and experience of not less than five years in actual practice to be together fully equal to the requirements for licenses in this state. Every license so issued shall state upon its face the grounds upon which it is granted, and the applicant may be required to furnish his proofs upon affidavit.

Registration. Every person practising dentistry in this state and not lawfully registered before this act takes effect, shall register in the office of the clerk of the county where his place of business is located, in a book kept by the clerk for such purpose, his name, age, office and postoffice address, date and number of his license to practise dentistry and the date of such registration, which registration he shall be entitled to make only upon showing to the county clerk his license or a duly authenticated copy thereof, and making an affidavit stating name, age, birthplace, the number of his license and the date of its issue; that he is the identical person named in the license; that before receiving the same he complied with all the preliminary requirements of this statute and the rules of the regents and board as to the terms and the amount of study and examination; that no money, other than the fees prescribed by this statute and said rules, was paid directly or indirectly for such license, and that no fraud, misrepresentation or mistake in a material regard was employed or occurred in order that such license should be conferred. The county clerk shall preserve such affidavit in a bound volume and shall issue to every licensee duly registering and making such affidavit, a certificate of registration in his county, which shall include a transcript of the registration. Such transcript and the license may be offered as presumptive evidence in all courts of the facts stated therein. The county clerk's fee for taking such registration and affidavit and issuing such certificate, shall be \$1. A practising dentist having registered a lawful authority to practise dentistry in one county of the state and removing such practice or part thereof to another county, or regularly engaging in practice or opening an office in another county, shall show or send by registered mail to the clerk of such other county his certificate or [of] registration. If such certificate clearly shows that the original registration was of an authority issued under seal by the regents, or if the certificate itself is indorsed by the regents as entitled to registration, the clerk shall thereupon register the applicant in the latter county, on receipt of a fee of 25 cents, and shall stamp or indorse on such certificate, the date and his name, preceded by the words, registered also in ——— county, and return the certificate to the applicant.

Examination fees. Every applicant for license to practise dentistry shall pay a fee of not more than \$25. From the fees provided by this article the regents may pay all proper expenses incurred by them under its pro-

visions, and any surplus at the end of any academic year shall be paid to the society nominating the examiners to defray its expenses incurred under the law.

If any practitioner of dentistry be charged under oath before the board with unprofessional or immoral conduct, or with gross ignorance, or inefficiency in his profession, they shall notify him to appear before them at an appointed time and place, with counsel, if he so desires, to answer said charges, furnishing to him a copy thereof. Upon the report of the board that the accused has been guilty of unprofessional or immoral conduct, or that he is grossly ignorant or inefficient in his profession, the regents may suspend the person so charged from the practice of dentistry for a limited season, or may revoke his license. Upon the revocation of any license, the fact shall be noted upon the records of the regents and the license shall be marked as canceled, of the date of its revocation. Upon presentation of a certificate of such cancelation to the clerk of any county wherein the licentiate may be registered, said clerk shall note the date of the cancelation on the register of dentists and cancel the registration. A conviction of felony shall forfeit a license to practise dentistry, and upon presentation to the regents or a county clerk of a certified copy of a court record showing that a practitioner of dentistry has been convicted of felony, that fact shall be noted on the record of license and clerk's register, and the license and registration shall be marked canceled. Any person who, after conviction of a felony shall practise dentistry in this state, shall be subject to all the penalties prescribed for the unlicensed practice of dentistry, providing that if such conviction be subsequently reversed upon appeal and the accused acquitted or discharged, his license shall become again operative from the date of such acquittal or discharge [As amended 1898, v. 2, ch. 355, § 2]

§163 Construction of this article. This article shall not be construed to prohibit an unlicensed person from performing merely mechanical work upon inert matter in a dental office or laboratory, or the student of a licentiate from assisting his preceptor in dental operations while in the presence and under the personal supervision of the instructor, or a duly licensed physician from treating diseases of the mouth or performing operations in oral surgery. But nothing in the provisions of this article shall be construed to permit the performance of dental operations by an unlicensed person under cover of the name of a registered practitioner. Any student of dentistry whose certificate of study under private preceptorship shall have been duly filed with the secretary of the state dental society at the time this act takes effect pursuant to the provisions of law then in force, may present himself for examination to the board under the same conditions as those under which he might have presented himself for examination before the censors of the state dental society under the laws in force when his certificate was filed; providing, however, that he shall file a notice with the regents on or before the first day of September, 1895, that he proposes availing himself of this exemption.

c) Any person who in any affidavit or examination required of an applicant for examination, license or registration under the laws regulating the practice of dentistry shall make wilfully a false statement in a material regard shall be guilty of perjury, and punishable upon conviction thereof by imprisonment not exceeding 10 years.

Such proof shall be made, if required, upon affidavit. Upon making such payment and proof the dental council, if satisfied with the same, shall issue to such applicant an order for examination before the state board of dental examiners. In case of failure at any such examination, the candidate, after the expiration of six months and within two years, shall have the privilege of a second examination by the said board, without the payment of an additional fee; but for any other subsequent examinations he shall pay the usual fees prescribed in this act. Said auditor shall receive for such filing and record a fee of \$1.

§ 1818 **Fees; expenses of board.** In order to provide the means for carrying out and maintaining the provisions of this act, the said board of examiners shall charge such person applying to or appearing before them for examination for a certificate of qualification the fee hereinbefore provided for, which fee shall be in no case returned; and out of the funds coming into the possession of the board from the fees so charged the sum of \$5 for each day actually engaged in the duties of their office and all legitimate and necessary expenses incurred in attending to the duties of said board shall be paid to each member of said board. PHARMACY

INTRODUCTION

Early schools of pharmacy

The first meeting in this country to consider the question of systematic pharmaceutical education was held in Philadelphia in 1821. At this meeting the apothecaries of Philadelphia formed a society to provide a system of instruction in pharmacy and to regulate the conduct of their business. The outcome of this action was the Philadelphia college of pharmacy, which was chartered by the Pennsylvania legislature in 1822. The school opened in 1821-22 with a course of lectures on materia medica and pharmacy, and a course on pharmaceutic and general chemistry. The first class was graduated in 1826. In the early years of the institution committees were appointed to expose adulterations of drugs and a library and cabinet were established. The need of a medium of publication was soon felt. In 1825 the *Journal of the Philadelphia college of pharmacy* was started, which became in 1835 the *American journal of pharmacy*.

The Philadelphia college of pharmacy was followed in 1823 by the Massachusetts college of pharmacy, in 1829 by the New York college of pharmacy, in 1838 by the department of pharmacy of Tulane university, in 1841 by the Maryland college of pharmacy.

Prior to 1840 pharmacists were not recognized in pharmacopoeial conventions. In 1850 the chartered schools were invited to send delegates to the decennial convention. In that revision and in the revisions of 1860, 1870 and 1880 pharmacists were well represented. In the convention of 1890, 16 of the 26 members composing the committee on final revision were pharmacists.

Growth

There has been a remarkable increase in schools of pharmacy and students of pharmacy in the past 21 years. In 1878 there were 13 schools with 1187 students. In 1899 there were 52 schools, with 3563 students. The increase in students in 21 years has been 200%. 36 of these schools maintain day sessions, 9 have evening sessions, 4 have both, 3 do not report this item. 14 are separate institutions, 38 are departments of other institutions. 45 grant degrees. 2 of the 52 schools were established between 1801 and 1825, 4 between 1826 and 1850, 8 between 1851 and 1875, 38 between 1876 and 1900.

Apprenticeship

The University of Michigan is said to have been the first institution in this country to graduate pharmacists without any practical experience. In 1898, 24 schools of pharmacy reported that they did not require any practical training. The original object of the early schools of pharmacy was to give a theoretic knowledge of pharmacy as a science and a higher degree of familiarity with botany and chemistry than could be attained in the limited term of apprenticeship. It was not intended that these schools should take the place of an apprenticeship in a pharmacy.

In recent years there has been no little discussion as to whether schools of pharmacy should require work with a druggist as a condition for graduation. The schools that do not exact this requirement admit its necessity to success as a pharmacist, but they claim that it is impracticable to determine whether or not the necessary practical training has been acquired by their matriculates, and that by providing under proper instructors suitable laboratory facilities for actual work with the drugs, they can give more practical experience than that afforded in many pharmacies where the prescription department is of little importance. There is force in this position in the case of schools that give thorough courses requiring the full time of students, specially if matriculation requirements insure a fair general preliminary education. Dr Gregory, dean of the Buffalo college of pharmacy writes as follows touching this matter: "Prior to 1880 the diploma of a school of pharmacy was generally the sole evidence of fitness as a pharmacist. Now the license is demanded. No one denies the value of experience in a pharmacy, but the responsibility of testing its character now rests with boards of examiners,

leaving the schools free to attend to the primary function of teaching."^a

Present tendencies

Dr A. B. Husted of the New York pharmacy board writes as follows touching present tendencies in the teaching of pharmacy:

"These tendencies are all in the line of advancement, in teaching more thoroughly the fundamental subjects of chemistry, pharmacy, materia medica and botany, and including the allied subjects, microscopy, analytic examination of medicines, foods, secretions and excretions of the human system and bacteriology. In the past, the instruction in all schools of pharmacy was confined to evening hours, all the students, and they were few, working during the day in the nearby retail and wholesale pharmacies. The establishment of chemical laboratories, where the student practically demonstrated what was taught in the classroom, was the first advance. Next came the pharmaceutical laboratory, devoted to the practical demonstration of the preparation of organic compounds; then the pharmacognosy room, and the microscopic laboratory, and today analytic and bacteriologic laboratories are being established. These extended courses of instruction demand that more time shall be devoted to the work, so that in place of all instruction being confined to evening hours, most schools now use a part of the day, and some occupy the entire time of the student, in courses extending over nine months in the year. Very many schools afford opportunity for farther work in optional and graduate courses.

Notwithstanding the increase in work and time demanded of the student of pharmacy, the number pursuing this study is greater than during any previous period. It will be inferred from what has been stated, that those who are now engaged in retail pharmacies are more competent than their predecessors, and have a more thorough knowledge of the agents in which they deal. This is true if the average education is considered, but nevertheless commercial tendencies have exercised a disadvantageous influence. The conditions of trade in the past were such as to allow those pharmacists who were so inclined, to devote their entire time to the study, care and preparation of medicines. Today the greater part of the time of

^aIt should be remembered that the schools which led in the abandonment of the apprenticeship requirement did not take this course through any lack of appreciation of the value of actual experience, but because the requirement as frequently enforced was a farce. Very properly the university schools took the ground that their degrees should stand for school work only, and that no institution could honestly vouch for the value of something for which there could be no effective standard and which in many cases was of absolutely no value.—*J. H. Beal*

the pharmacist must be devoted to the commercial side of his work, or he will soon find himself without patrons, and therefore without the means to carry on his business. Again, many if not a majority of the agents in which he deals, may and must be had from the large manufacturer. These conditions have attracted the more studious and therefore the better educated pharmacists to those pursuits that foster the educational side of pharmacy, leaving the retail pharmacies in charge of those in whom the commercial spirit predominates. When the educational attainments of the retail pharmacist are considered, I question if he has made the advance that the teaching of the schools would indicate."

Legislation

Apothecaries were organized into a privileged body in civilized parts of Europe in the middle ages, and from that period those who dispense drugs have been required to possess certain qualifications. In the United States there have not been till lately any legal restrictions worthy of the name, but any ignorant boy whom an apothecary chose to employ has been free to dispense drugs.

Georgia seems to have been the first state that attempted to restrict the practice of pharmacy throughout the state to competent persons. The law, enacted in 1825, gave the state medical board power to examine and license apothecaries. The Alabama code of 1852 contained a similar provision. In 1868 a member of the Georgia board reported that he knew of only five licentiates of the board that were then engaged in business in the state. An act was passed in New York in 1839 that applied solely to New York city, in Pennsylvania in 1866 that applied solely to Lycoming county. These early acts had little effect in protecting the public from ignorant apothecaries.

In 1869 a draft of a pharmacy law was recommended by the American pharmaceutical association which required graduation in pharmacy as a condition for license. It was hoped in this way to secure through the schools of pharmacy men better fitted by preliminary education and professional training for the practice of the profession. Rhode Island was the only state which enacted this law (March 1870), and it was amended in the following year. At present there is no pharmacy law in the United States which requires attendance and graduation at a school of pharmacy as a condition for license.

Since 1869 laws restricting the practice of pharmacy have been enacted in almost every state through the efforts of members of the profession. The American pharmaceutical association, organized in 1852, has been a potent factor in the attempt to give pharmacy a professional standing equal to that of other branches

of medicine. Its work in this direction has been of special value since the creation in 1887 of the sections of education and legislation. A mass of material on pharmaceutic education and legislation in this country and abroad has been collected and made available through the annual reports of the association.

The 1898 report of the section on education and legislation of the American pharmaceutical association summarizes as follows the fundamental defects in present laws regulating the practice of pharmacy in the United States:

1 Failure to require a sufficient preliminary general education.

2 Failure to demand graduation from a school of pharmacy for admission to the licensing examination or for registration.

3 The privileges accorded to physicians, manufacturers, wholesalers, etc.

4 Failure to provide periods of apprenticeship and courses of study that would make it impracticable for any one to engage in the practice of pharmacy on his own account before the age of 24 or 25 years.

Dr. J. H. Beal of the department of pharmacy at Scio college, Ohio, was appointed by the section on education and legislation of the American pharmaceutical association at its 1899 meeting to draft a model pharmacy law. If approved this law can be introduced simultaneously into the legislatures of all the states. Dr Beal writes Nov. 16, 1899: "Foreigners are often puzzled to account for the diversity in our legislation. The fact should be emphasized that all matters of internal police control are left exclusively to the several states, so that national laws regulating professional practice can not be enacted."

That a preliminary general education equivalent to graduation from an accredited high school will be required eventually for admission to the study of pharmacy is highly probable, but this demand will not be made for some time to come except by a few progressive states. Present tendencies indicate that graduation from an accredited school of pharmacy will also be required eventually for admission to the licensing test or for registration. The American pharmaceutical association and a number of state associations have within the last year favored this requirement.

ASSOCIATIONS

While the matter of licensing pharmacists belongs to the several states and is not a national prerogative, there are certain associations of a semi-national character that have greatly influenced and brought into closer uniformity the laws, rules and regulations, professional and preliminary requirements for admission to the study and practice of pharmacy.

American pharmaceutical association, General secretary Charles Caspari jr, Baltimore, Md. Next meeting, Richmond, Va., May 1900:

Initial meeting at New York 1851, organized at Philadelphia 1852, incorporated at Washington, February 1888. The aim is to unite the educated and reputable pharmacists and druggists of America in the following objects: 1) to improve and regulate the drug market; 2) to encourage such proper relations as promote the public welfare; 3) to improve the science and art of pharmacy; 4) to regulate the system of apprenticeship and employment; 5) to suppress empiricism; 6) to uphold standards of authority in education, theory and practice of pharmacy; 7) to create and maintain a standard of professional honesty equal to the amount of their professional knowledge. Meetings annually, last of August or first of September. Pharmacists and druggists of good moral and professional standing are eligible for membership as well as teachers of pharmacy, chemistry and botany. On the proposition of two members the council recommends a candidate to the association, which elects by vote, and membership is completed by signing the constitution and by-laws and paying the annual dues of the current year, \$5.

To expedite and render more efficient the work of the association three sections are formed and the seventh, eighth and ninth sessions consider the business assigned to the third section, pharmaceutical legislation and education. In 1893 a paper entitled the Requirements for graduation in American colleges of pharmacy was read before this section and a resolution introduced to determine what constitutes colleges of pharmacy, that is, the requirements for graduation are 1) age, 21 years; 2) experience in pharmacy, four years, including time at college; 3) two courses of at least six months each, extending over more than one year.

The resolution was referred to a committee and reported adversely at the next meeting. However two resolutions were offered and the second after amendment was adopted, viz: "*Resolved*, That a committee be appointed consisting of one representative from each of the colleges and schools of pharmacy of this country represented by members in the society, with three members of the association, none of whom are teachers in any pharmaceutic col-

lege or school. The duty of said committee shall be to take into careful consideration the condition of pharmaceutic education in this country, make recommendations relative thereto, and report to the association at its next annual meeting." In August 1895 the committee reported the following resolution which was tabled: "*Resolved*, That it is the sense of the American pharmaceutical association that the cause of pharmaceutic education, would be advanced if all pharmaceutic schools that confer the degree of graduate in pharmacy should adopt the following suggestions:

1 That the standard for admission shall not be less than the equivalent for admission to the public high schools of the larger cities of the United States.

2 That each student shall attend not less than two courses of didactic instruction, each course extending over a period of not less than 28 weeks, the student to be in attendance for not less than six hours of such instruction in each week, and not less than one hundred and sixty (160) hours in each session. That the time devoted to this instruction shall be limited to the subjects of pharmacy, chemistry and materia medica or botany, and not include that in collateral branches. That not less than three hundred hours of laboratory work shall be required of each student in each term.

3 That every student, in order to graduate, should be familiar with all the teachings of the United States pharmacopoeia, and fully capable of performing all operations mentioned in it.

4 That as far as practicable students shall give their whole time to the work of the college during its sessions, and not divide their time between work in a store and work in a college. That no student shall be retained at college whose outside duties will not permit him to do full justice to his studies or laboratory work.

5 That students should not be admitted to the school or college at less than 18 years of age; and that the degree should not be conferred upon any person who is less than 21 years of age at the time of completing his final course.

6 That the degree of Ph. G. should be conferred upon any person who has successfully passed the required examinations, without any regard to practical experience in a drug store."

In August 1896 the committee on chairman's address submitted the following report which was adopted: "That the subject of preliminary education be presented by the committee of this section to the various state pharmaceutic associations for consideration and report to this section at its next annual meeting.

[Second, we approve the opinion expressed by the chair, that a distinction should be made between graduates with practical experience and those without it. The degree of Ph. C. should be confined to the latter class, and that of Ph. G. should designate those

who have graduated with a store experience. In view of the confusion in this respect, because of the present practice of the schools of pharmacy we recommend that all boards of pharmacy use their influence to secure such amendments to their laws as shall require an examination for *all* candidates for registration.

In the opinion of the committee the interchange of certificates of examination is desirable, and will follow when a reasonable degree of uniformity is obtained in the examinations of the different boards of pharmacy."

In August 1898 a report on preliminary education requirements by J. H. Beal gives the results of the efforts in this line during 1897 and 1898. See *Proceedings American pharmaceutical association* p. 548-52.

On Friday, Sep. 8, 1899 J. H. Beal, of Ohio, was appointed a committee of one to draft a model pharmacy law, have it printed, distributed to the members of the association and the pharmaceutical press before the next meeting of the association, inviting its study and criticism in order that it may be thoroughly and understandingly discussed.

EXAMINATION DEPARTMENTS OR BOARDS

These extracts are made for the convenience of administrative and professional bodies, practitioners and candidates for registration or examination. While rules are legal and are based on the statutes, often being the sole requirements, they are not statutes and for this reason they are properly grouped in a separate division. All facts given in the synopsis or the statutes are omitted as rigidly as consistent with clearness. The extracts give as uniformly as possible:

Licensing requirements

Age, moral character, general education, professional subjects of examinations, fees, certificates, affidavits

Examination requirements

Standing, failure, percent, language, date, place, program

Registration requirements

The board holds four examinations each year. **Registration** (*see* p. 1015).

Applicants for examination must make application under proper vouchers at least 10 days before the meeting of the board. Examinations are in writing. An average standing of 75%, the answers to be liberally construed and not less than 50% in any branch, entitles the candidate to registration. The examination is on 25 specimens of crude drugs, 50 questions on materia medica and pharmacy each, 25 questions on chemistry and 10 to 20 prescriptions. Examinations are in writing. The salary of said secretary and treasurer shall not exceed \$1500 per annum.

[*As amended 1891, ch. 104, §4*]

§ 661 **Certificate of registration.** Every person claiming the right of registration under this act, who shall, within three months after the passage of this act, forward to the board of pharmacy satisfactory proof, supported by his affidavit, that he was engaged in the business of dispensing pharmacist on his account in the state of Minnesota at the time of the passage of this act, as provided in § 2, shall, upon the payment of the fee hereinafter mentioned, be granted a certificate of registration. [*As amended 1891, ch. 104, § 8*]

§ 180 **State board; appointment.** There shall continue to be a state board of pharmacy for the state, excepting the counties of New York, Kings and Erie, of five members, each holding office for a term of five years from the first Tuesday in September of the year when such term begins. The New York state pharmaceutical association shall at each annual meeting nominate five pharmacists, residents of the state but not of the said counties, from which number the governor shall fill the vacancy annually occurring in such board by expiration of the term of one of the incumbents. If a vacancy occurs from any other cause than expiration of term, the governor shall fill the vacancy from the list of names so nominated at the annual meeting of such association next preceding the happening of the vacancy.

§ 181 **Oaths; meetings; officers; by-laws.** Each member of such board shall, before entering upon the discharge of his duties, take and subscribe the constitutional oath of office and file the same in the office of the secretary of state. The board shall meet annually on the first Tuesday of September at 12 o'clock, noon, and elect a president, secretary and treasurer, who shall hold office for one year. It shall hold other meetings at least once in three months. The board may make by-laws and regulations for the examination of applicants for licenses and the granting of licenses to applicants.

§ 182 **Kinds of license.** There shall be two grades of license established, that of pharmacist, which confers on the licentiate the privilege of carrying on the practice of pharmacy, either on his own account, as proprietor, or for some other person, and that of assistant pharmacist, which entitles the holder to retail medicines and poisons, but not to compound physicians' prescriptions in the absence of the licensed pharmacist.

§ 183 **Duties of board.** Such board of pharmacy shall: 1) examine all applicants for license under this article, and grant licenses to such as may be entitled thereto; 2) keep a record of all pharmacists and assistant pharmacists licensed or authorized by it; 3) investigate all complaints of disregard of, non-compliance with, or violation of any provision of this article, and bring all such cases, and all cases of offenses against the provisions of the penal code relating to pharmacy, to the notice of the proper prosecuting officer; 4) render annually to the governor and to the state pharmaceutical association at its annual meeting, a full statement of all its receipts and disbursements during the preceding year.

§ 184 Who are entitled to license. Any person who has had four years' experience in the practice of pharmacy, or any person who holds a certificate of registration from any board of pharmacy legally created under the laws of this state, is entitled to license as a pharmacist, and any person who has had two years' experience in the practice of pharmacy is entitled to a license as an assistant pharmacist on complying with the regulations of the state board of pharmacy and other requirements as provided in this article. Any person who, on the 24th day of May, 1884, was entitled to be licensed as a pharmacist, but who failed within 90 days thereafter to apply to the state board for a license, may, at any time after this chapter takes effect, on eight days' notice to the secretary of such board, apply to the supreme court, at a special term, in the district where such applicant resides, for an order directing such board to issue such license; and such court may grant such order, on proof of good cause for the neglect to so apply, and such board shall issue such license on receipt of a certified copy of such order served upon the secretary of such board.

§ 185 Additional requirements. No person shall be entitled to a license as a pharmacist or assistant pharmacist from any board of pharmacy created under the laws of this state, unless he furnish proof to such board by his own affidavit or otherwise, in addition to the other requirements of law relating to the granting of licenses by such board, that he is a resident of the city, county or district for which such board is created, or if a non-resident, that he intends to practise in such city, county or district; that he has not applied for a license to or been examined by any board of pharmacy of the state and been refused a license within six months immediately preceding.

§ 186 Fee; posting and revocation of license. No license shall be granted by such state board, under this article, unless the applicant pays to such board a fee of \$10 for a license as pharmacist, after examination by this board, or \$5 for a license or certificate of registration as pharmacist, after examination by any other legal board of this state, and \$3 for a license as assistant pharmacist. Every person to whom a license is granted by such board shall post it and keep it posted in a conspicuous part of the pharmacy in which such person does business. No license granted by such board shall be revoked except for just and sufficient cause. No person shall hereafter practise as a pharmacist unless a license has been granted to such person by the state board of pharmacy.

§ 187 Application of article limited. This article shall not apply to the business of a practitioner of medicine who is not the proprietor of a store for the retailing of drugs, medicines or poisons and shall not prevent practitioners of medicine from supplying their patients with such articles as they may deem proper, nor shall it apply to persons who sell medicines or poisons at wholesale, or to the sale of Paris green, white hellebore and other poisons for destroying insects, or any substance for use in the arts, or to the manufacture and sale of proprietary medicines, or to the sale by retail dealers or merchants of ammonia, bicar-

bonate of soda, borax, camphor, castor oil, cream tartar, dye-stuffs, Epsom salts, essence ginger, essence peppermint, essence wintergreen, Glauber's salts, glycerine, licorice, olive oil, rochelle salts, salammoniac, saltpeter, salts of tartar, salsoda and sulphur, or to the sale of the usual domestic remedies by retail dealers in the rural districts. The term 'usual domestic remedies,' here employed, means medicines, a knowledge of the properties of which and dose has been acquired for common use and includes only such remedies as may be safely employed without the advice of a physician, such as paregoric, magnesia, aloes, myrrh, guaiac, arnica, rhubarb, senna, squills, ipecac and preparations of the same, spirits of niter, essence anise and other like remedies, but does not include opium, morphine, laudanum, strychnine, arsenic, belladonna, aconite and other poisons requiring knowledge and pharmaceutical skill to safely dispense, unless they are sold in original packages, or packages put up by and bearing the label of a licensed pharmacist. The term 'rural districts' here employed, shall apply only to small villages and country districts having no store where pharmacy is practised. The term 'practice of pharmacy,' when used in this article, means the compounding of prescriptions or of any United States pharmacopoeial preparations, or of any drug or poison, to be used as medicines, or the retailing of any drug or poison, except as provided for in this section. [*As amended 1897, v. 1, ch. 297*]

§ 188 **Apprentices.** This article shall not be construed to prohibit the employment in any pharmacy, of apprentices for the purpose of being instructed in the practice of pharmacy; but such apprentices shall not be permitted to prepare and dispense physicians' prescriptions, or to sell or furnish medicines or poisons except in the presence of and under the supervision of a licensed pharmacist.

§ 189 **Exemption of New York, Kings and Erie counties.** Except the provisions relating to the proof to be furnished to any board of pharmacy by an applicant for a license, this article shall not apply to the counties of New York, Kings and Erie, but a license as a pharmacist granted any person after the examination by any board of pharmacy, legally created under the laws of this state, shall entitle such person to a license or certificate of registration from any other board of pharmacy so created, upon presenting to such board his license and complying with the formal requirements of the laws.

§ 190 **Penalties; expenses.** Any person violating any provision of this article shall forfeit to the county where the violation occurs the sum of \$50 for every such violation, which may be sued for and recovered in the name of the county by the state board of pharmacy, which may retain out of all penalties collected by it the costs and expenses of such collection, including counsel fees necessarily paid, and the residue, not exceeding one half of such penalties shall be paid into the treasury of the county. Annually thereafter, during the time he shall continue in such duties, he shall pay to the secretary a sum not exceeding \$1.50, for which he shall receive a renewal of his certificate.

VETERINARY MEDICINE

INTRODUCTION

Early veterinary schools

Veterinary medicine was pursued as a science by the ancient Egyptians and by the Greeks, but after the destruction of the eastern empire little progress was made in this science till the establishment of a veterinary school at Lyons in 1762. This institution was soon followed by similar schools in other European countries.

Before 1850 graduates in veterinary medicine were almost unknown in America, some of the larger cities only being able to furnish isolated veterinarians who had been educated in the veterinary schools of Europe. The country as a whole, including most of the large cities, had to be satisfied with such service as could be had from the blacksmith, from the physician who sought to apply to animals the principles taught in the medical schools and from the *horse doctor* who, with no basis whatever of medical knowledge, boldly and recklessly administered drugs.

The first step toward systematic veterinary education was the granting of a charter in 1852 by the legislature of Pennsylvania and the securing of a subscription of \$40,000, to serve in the organization of a veterinary school in Philadelphia. This school opened in 1853 but no students responded. In 1859-60 two students were secured, one of whom was a graduate of the Boston veterinary college which had been chartered in 1855. Both of

these schools had a short life, but the same cities have now each its veterinary school in connection with the University of Pennsylvania and Harvard respectively. Each of these schools has a matriculation examination and a three years' course of eight months each. In 1857 the New York college of veterinary surgeons was chartered and in 1875 the American veterinary college was opened. These two New York city schools were maintained as proprietary institutions till 1899 when they were placed on a strictly university footing by consolidation under New York university.

In the succeeding years veterinary schools sprang into existence in many of the large cities, Chicago, Kansas City, Cincinnati, Baltimore, Washington, Grand Rapids, Detroit, etc., all like the earlier schools in Boston, Philadelphia and New York, being private ventures, dependent on their financial returns, and with a curriculum of 10 or 12 months representing two years of five or six months each.

Advances made by state schools

The necessity for a fuller, graded course based on matriculation requirements which would be a guaranty of fitness to pursue such course profitably, was first voiced by schools connected with state colleges and universities. As early as 1868, Illinois industrial university^a and Cornell university instituted two veterinary chairs, and filled them with graduates of the Royal college of veterinary surgeons, England. Students were admitted only on the basis of the regular university matriculation and were held to a course of four years. Illinois industrial university is said to have turned out several good practitioners, while Cornell graduated four veterinarians, three of whom have been prominent and valued members of the United States bureau of animal industry, one being its chief. These institutions were followed in 1879 by the veterinary department of the Iowa agricultural and mechanical college with moderate matriculation requirements, and a three years' graded course, in 1889 by the veterinary department of the Ohio state university with equal or still greater requirements, and in 1890 by the veterinary department of the University of Minnesota with similar standards.

The important advances made by these state schools of veterinary medicine may be better illustrated by the fact that their academic year extends to eight or nine months, while the year of the private school covered but five or six months. The total curriculum of the state veterinary school therefore extended from 24 to 27 months or in the case of Cornell university to 36 months, as against the 10 or 12 months of the private school.

^aBecame University of Illinois in 1885.

Requirements of American veterinary medical association

The United States veterinary medical association,^a adopted in 1891 an article providing that all applicants for membership should be graduates of a recognized veterinary school with a curriculum of at least three years, of six months each, and a corps of instructors comprising at least four veterinarians. Nearly all the schools which had not already done so soon placed themselves in harmony with these requirements.

New York's leadership

The next step in advance came in 1895 when the New York legislature enacted that at least a high school diploma representing four years of high school work should be offered for admission to a veterinary school, that the veterinary curriculum should embrace three full years, and that only those who had met both requirements could be admitted to the regents veterinary examination for license to practise in the state. For the present this places New York in the lead. To begin practice in this state the candidate must reach a standard which is not demanded in any other state in the Union. But even within New York state there have been inequalities in the curriculum. In the private veterinary schools in New York city, the old session of six months has stood for a year, while in the New York state veterinary college, Cornell university, a nine month year is required. To the legal requirement for matriculation, therefore, which is common to all schools in the state, the period devoted to veterinary education in the state school at Cornell is one half longer than that which has been required in the private schools in New York city. Now that these schools have consolidated under New York university, it is hoped that these inequalities will disappear. As a means of extending the benefits of its curriculum to their full legal possibilities, Cornell offers tuition free to all residents of the state, and opens to competition by the entering veterinary student 18 scholarships of an annual value of \$200 and to veterinary graduates a fellowship of an annual value of \$500.

Action in Massachusetts

The legislature of Massachusetts has recently appropriated \$25,000 for a veterinary laboratory and stable hospital in connection with the state agricultural college. Beginning with Jan. 1, 1899 there is to be an annual appropriation of \$1000 as a fund for the maintenance of the veterinary laboratory.

^aNow the American veterinary medical association.

Higher standards

An impartial survey of the entire field shows a marked tendency toward higher standards and, as an important step in this direction, the assumption of the work of veterinary education by the state under such university supervision as will give it character and eliminate the disturbing element of personal pecuniary speculation.

Army veterinary service

The United States army has long had its nominal veterinarians, but many of these were uneducated men, appointed by political influence or advanced from the position of farrier major, and there was little to tempt professional men of character and ability into this service. The army veterinarian had practically no army status, no rights, no prospects. He was not even enlisted, there was no special provision for him during service and no pension if he had to retire disabled. In the last session of congress the first step was taken for the improvement of the army veterinary service by enacting that the army veterinarian of the first grade must enter on the basis of an examination to be prescribed by the secretary of war, and that he shall have the pay and allowances of a second lieutenant of cavalry, while those of the second grade shall have \$75 a month and the allowances of a sergeant major.

Veterinary workers in agricultural colleges and experiment stations

A steadily increasing recognition of the veterinary profession is seen in the appointment of veterinarians to chairs in state agricultural colleges and to positions in agricultural experiment stations. Here too the selection thoroughly sustains the growing demand for higher standards. 32 such positions are filled, practically without exception, by men who have passed an exacting matriculation examination and have had a prolonged course of veterinary study. Many add to their veterinary degree the academic B. A., B. S., B. Agr., or the professional M. D.

Municipal, state and national veterinarians

Since its organization in 1882 the United States bureau of animal industry has provided the different states with the funds necessary for the eradication of the cattle lung plague which had been imported from Europe in 1848, the expert and other employees having been made both national and state officers so that they could act as one or the other as the case demanded.

It has done most valuable work on Texas fever, anthrax, emphysematous anthrax, hog cholera, swine plague and many other epizootic, enzootic, dietetic and contagious diseases, following the lines of prevention, immunization and serum therapy. It has continued the quarantine of imported animals since it superseded the treasury cattle commission in 1882. It has instituted meat inspection by experts in national employ, at the great packing centers, of meats intended for the export or interstate trade. In a number of states, a state veterinarian and even assistant state veterinarians have been appointed and, though in some instances the old spoils system has retained sufficient vitality to have the inexpert appointed to do expert work, yet in the main the interests of the public and of the profession have been consulted in the appointment of men educated in the duties of the office. In many of the larger cities too, the veterinarian has been recognized in his appointment as municipal meat inspector or as stock inspector. With the continued improvement of the civil service and the imperative demand for public servants who are specially trained and efficient in performing their respective duties, this recognition must soon become the rule.

Indications from veterinary literature

A review of recent veterinary literature shows much thought and research, yet as an indication of the predominant influence of sanitary science and the control of contagious diseases, it need only be said that of papers presented before the American veterinary medical association two thirds have been on such subjects. This indicates a healthful interest in the most vital and promising fields of veterinary research, and speaks well for the supply of experts to work in this field in the future. It is worthy of note that in all strong veterinary schools work in bacteriology is made a first consideration.

Field for educated veterinarians

In 1888 there were 6 veterinary schools with 323 students. In 1899 there were 17 schools with 249 instructors and 378 students. 6 of these 17 schools are separate institutions, 11 are departments of other institutions. 7 maintain day sessions, 3 have both day and evening sessions, 7 do not report this item. 16 schools confer degrees.

There is a broad field in the United States for educated veterinarians, and in view of this fact it is surprising that there are not more veterinary medical students. To assert that this is due to the lengthening to three years of the courses in the veterinary

medical schools and to the use of bicycles and electric cars as substitutes for horses is not a satisfactory explanation. Horses will always be in large demand. Furthermore, the close relation between the health of man and that of the domestic animals, specially those that furnish meat and milk, shows the necessity of careful attention to their health. The reports of the department of agriculture give a value of about \$2,000,000,000 to the live stock of the United States, and the protection of these enormous interests demands the services of trained veterinarians. The science of meat inspection has not as yet commanded with us the attention it should receive. The work of the national government in this respect is confined to international and interstate trade, principally to the large western packing houses. Local municipal inspection is in its infancy and state legislatures have not as a rule enacted special measures of protection. There now seems to be, however, an increasing demand for scientific work along these lines and the best veterinary schools are recognizing this necessity in their courses of study.

Synopsis of requirements

The first law restricting the practice of veterinary medicine was enacted in New York in 1886. In 1899, 12 states had veterinary medical laws.

In 5 states a veterinary diploma does not admit to the practice of veterinary medicine, an examination being required in all cases:

Minnesota New York North Dakota Pennsylvania Virginia

The following require for admission to the licensing examination:

Minnesota, diploma from veterinary school

New York, full high school course, diploma of veterinary school with satisfactory standard

North Dakota, diploma from veterinary school

Pennsylvania, competent common school education, approved diploma from legally incorporated veterinary school having a course of three years

Virginia requires the licensing examination only

Illinois requires approved veterinary diploma or 3 years' practice or an examination

Ohio requires approved veterinary diploma or examination by state board

California and Maryland require veterinary diploma approved by state board

New Jersey admits on veterinary diploma submitted to unqualified local authority

Wisconsin admits on veterinary diploma or certificate submitted to unqualified local authority, and practitioners five years prior to 1887

Michigan registers veterinary medical degrees without examination and issues certificates of "veterinary surgeon" to those who pass the examinations of the state veterinary board

The other states and territories have no laws on the subject.

ASSOCIATIONS

While the matter of licensing veterinarians belongs to the several states and is not a national prerogative, there are certain associations of a semi-national character that have greatly influenced and brought into closer uniformity the laws, rules, and regulations, professional and preliminary requirements for admission to the study and practice of veterinary medicine.

American veterinary medical association, Secretary S. Stewart, 7½ South James st., Kansas City, Kansas.

United States veterinary medical association organized 1863, changed to present title September 1898. Meetings annual in first week of September. The purpose of the association is to

contribute to the diffusion of true science and particularly the knowledge of veterinary medicine and surgery. A candidate for membership must be vouched for by a member or his state's secretary, must be a graduate of a regularly organized and recognized veterinary school, which has a curriculum of at least three years of six months each, specially devoted to the study of veterinary science, whose corps of instructors contains at least four veterinarians; must pay an initiation fee of \$5 and annual dues of \$3, must sign the constitution and by-laws. Applications are referred to the executive committee, by it reported to the association and applicants are elected on a two-thirds vote of the members present.

The officers and board of censors comprise the executive committee which meets annually, examines credentials, hears complaints and reports to the association. The committee on intelligence and education collects and reports to the association recent veterinary medical facts and intelligence.

From the code of ethics. 1) No member to assume a title to which he has not a just claim; 2) to endeavor to build up a practice by undercharging; 3) to speak disrespectfully of another's professional reputation; 4) to advertise secret medicines.

Valuable reports by the committee on intelligence are found in the proceedings.

The following are the veterinary schools recognized by the association:

California Veterinary dep't, Univ. of California, San Francisco
D. C. United States college of veterinary surgeons, Washington
Illinois Chicago veterinary college

McKillip veterinary college, Chicago

Iowa Veterinary department, Iowa state college, Ames

Massachusetts Harvard university, Boston

Missouri Kansas City veterinary college

New York American veterinary college, New York^a

New York college of veterinary surgeons^a

New York state vet. coll., Cornell univ., Ithaca

Ohio Ohio state univ., Coll. of veterinary medicine, Columbus

Pennsylvania Veterinary dep't, Univ. of Penn., Philadelphia

Quebec Veterinary department, McGill university, Montreal

Association of veterinary faculties and examining boards of North America, secretary Dr L. A. Merillat, McKillip veterinary college, Chicago, Ill. **Association of veterinary faculties** organized 1894, present title 1898. Purpose. The discussion of matters connected with veterinary education, methods of instruction, standards for graduation and practice, state licenses to practise and interchange of licenses.

^aConsolidated 1899, new title. see Statements of New York's schools.

The association consists of members of governing faculties and teaching staffs of all veterinary schools of North America which confer a degree in veterinary science, and of members of state veterinary examining boards that grant licenses to practise. Each school and board has one vote to be cast by the properly appointed delegate.

The committee on uniform standard of entrance examination, reported September 1897 and presented a valuable résumé of the matriculation requirements of Europe and America (*see Proc. U. S. vet. med. ass'n*, p. 226-35). A report on uniformity of state regulations governing the practice of veterinary medicine at the same meeting presented the chief causes preventing uniformity.

A special committee was appointed to report on the advisability of forming a national examining board and that provision be made for cooperating with state associations to secure a uniform provision in legislation authorizing the examining board to establish the standard of examination and to accept the certificate of other boards that have satisfactory requirements.

The special committee reported September 1898, Dr James Law presenting a paper on the cooperation of the various examining boards and the desirability of establishing an interstate examining board the certificate of which would be accepted by the boards of all states, followed by Dr A. W. Clement in a paper discussing the subject. Dr Law in conclusion saw "no way of reaching a satisfactory system of reciprocity of state examinations and licenses through the cumbrous machinery of a national board of examiners. The satisfactory operation of such a board can only be secured by raising the requirements of all states to the highest existing standard. If this uniform elevation of the standard to the highest present requirement can be secured the national examining board will be rendered unnecessary as the different state licenses should thus become interchangeable. So long as a certain number of states are unprepared to adopt the highest existing requirements the only alternative is to group the states according to their standards, and let there be reciprocity of license among the states of any given group and acceptance of their licenses by all states holding to a lower requirement."

Dr Clement suggested "that the laws governing practice be reduced to one clause, namely, that all applicants before being allowed to register should graduate from a school requiring at least three years' course of study, and should pass such examinations as may be required of them.

STATUTES

Under this title are the laws or their equivalents governing the admission to the practice of veterinary medicine in each political division of the United States revised to the latest practicable moment, and arranged alphabetically. For convenience of reference certain facts from the most reliable and recent sources of information are uniformly given in connection with each political division.

Geographic information, 1) location, 2) area, 3) population

Legislative information, 4) title of the law-making body, 5) frequency of its sessions, 6) time of next meeting, 7) place, 8) date of the last statute or amendment published, 9) date of the last statute consulted.

In editing and revising the statutes care has been taken to omit all irrelevant matter and all inoperative by reason of time limit or amendments, to preserve the phraseology and punctuation and to give the sources of information. Minor changes involving paragraphing, numbering, capitalization and spelling have been made in accord with the editing rules of the University when the change affected the significance of the law in no particular. Volume and page numbers are separated by a colon; e. g. 1:256 means vol. 1, p. 256. For convenience side heads are inserted when not given in the law.

UNITED STATES

Central North America; area 3,668,167 sq. m.; population 62,979,766 (75,466,659 not including Cuba, the Philippines and Puerto Rico); federal republic; annual legislation.

Sources of information: the *Statesman's year book* and a standard geography. When they differed the various political almanacs were consulted and the weight of authority taken; population taken uniformly from the census report of 1890; an official estimate for the year 1899 follows in curves; title of law-making body from the *Statesman's year book*; frequency of session from the legislation bulletin of the University. The statutes or codes of the various states found in New York state library, when the laws could not be secured from officials.

The United States has no uniform law regulating the practice of veterinary medicine. Each state prescribes its own requirements.

§2 **Veterinary medical board; appointment; term; compensation.** 1) This board of examiners shall be known as the state veterinary medical board, and shall consist of five duly qualified practitioners in veterinary medicine and surgery, whose duty it shall be to carry out the purposes and enforce the provisions of this act. 2) The members of the state veterinary medical board shall be appointed by the governor of the state. 3) The board so appointed shall hold their office for four years, and the compensation of each member of said state veterinary medical board shall be \$5 per diem, exclusive of all necessary expenses while actually engaged in the duty of their office at the meetings of said board. 4) A meeting of the state veterinary medical board shall be held at least once in every six months after the appointment of said board by the governor of the state of California, such meetings to be held alternately in San Francisco and Los Angeles. 5) Three members of the state veterinary medical board shall constitute a quorum. 6) Said compensation to be paid out of the fees and penalties received under the provisions of this act, and no part of the salary or other expenses of the state veterinary

medical board shall be paid out of the state treasury. 7) All moneys received by said state veterinary medical board as such fees and penalties, in excess of the compensation and expense of the state veterinary medical board, shall be annually paid into the state treasury, and become a part of the general fund of the state.

§ 3 **Applicants holding diplomas; examination of others.** 1) Said state veterinary medical board shall examine all diplomas as to their genuineness. Each applicant not holding a diploma shall submit to a theoretical and practical examination before the state veterinary medical board; said examination to be written or oral, or both, and sufficiently strict to satisfy said board that the applicant is competent to practise veterinary medicine and surgery. 2) An examination fee of \$5 shall be paid to the state veterinary medical board by the holder of a diploma, and \$10 by an applicant not holding a diploma; said money shall be paid by the applicant before examination. 3) In case of failure of approval, said fee shall be forfeited to the state veterinary medical board.

§ 7 **Practice of veterinary medicine defined; not to apply.** Any person shall be regarded as practising veterinary medicine and surgery, within the meaning of this act, who shall have received a license as mentioned in § 5. But nothing in this act shall be construed to prohibit mem-

bers of the medical profession from prescribing for domestic animals in case of emergency, and collecting a fee therefor, nor to prohibit gratuitous services in an emergency, nor prevent any person from practising veterinary medicine or surgery on any animal belonging to himself or herself. And this act shall not apply to commissioned veterinary surgeons in the United States army.

All applications for a license to practise veterinary medicine and surgery in the state of Illinois under the provisions of this act shall be made to the state board of live stock commissioners through its secretary, who shall act as secretary for the board of veterinary examiners, and each application must set forth fully the grounds upon which the application is based and, in the case of graduates of veterinary colleges, must be accompanied by the diploma of the applicant and an affidavit setting forth that the applicant is a graduate of a certain veterinary college mentioned in the diploma and is the person to whom the diploma in question was originally issued. And in the case of practitioners who are nongraduates, the application shall be accompanied by an affidavit stating the number of years that the applicant has been engaged in the continuous practice of veterinary medicine and surgery in the state of Illinois, and any other information that may be required by the state board of live stock commissioners. Each application for a license by a graduate in possession of a diploma and by a practitioner shall be accompanied by a license fee of \$5. The state board of veterinary examiners shall examine all applicants not entitled to practise by reason of being in possession of a diploma, or of having practised three years, presenting themselves for that purpose; said examination to be written or oral, or both, and shall include the following subjects: veterinary anatomy, surgery, practice of medicine, obstetrics, pathology, chemistry, veterinary diagnosis, materia medica, therapeutics, physiology, sanitary medicine and meat and milk inspection, and such other branches as the board of veterinary examiners may prescribe. Birdseye's *Revised statutes* 1896, 2d ed. 2 2465

§ 170 **Definitions.** As used in this article:

1 University means University of the State of New York.

2 Regents means board of regents of the University of the State of New York.

3 Board means a board of veterinary medical examiners of the state of New York.

4 Veterinary medical examiner means a member of a board of veterinary medical examiners of the state of New York.

5 Veterinary school means any veterinary school, college or department of a university, registered by the regents as maintaining a proper veterinary medical standard and as legally incorporated.

6 Veterinary medicine means veterinary medicine and surgery, or any branch thereof.

7 Veterinarian means veterinary physician and surgeon.

§ 171 **Qualifications for practice.** No person shall practise veterinary medicine after July 1, 1895, unless previously registered and legally authorized, unless licensed by the regents and registered as required by this article; nor shall any person practise veterinary medicine who has ever been convicted of a felony by any court, or whose authority to practise is suspended or revoked by the regents on recommendation of a state board.

§ 172 **State board of veterinary medical examiners.** There shall be a board of veterinary medical examiners of five members, each of whom shall hold office for five years from August 1 of the year in which appointed. The New York state veterinary medical society shall at each annual meeting nominate twice the number of examiners to be appointed that year on the board. The names of such nominees shall be annually transmitted under seal by the president and secretary prior to May 1, to the regents who shall, prior to August 1, appoint from such lists the examiners required to fill any vacancies that will occur from expiration of term on July 31. Any other vacancy, however occurring, shall likewise be filled by the regents for the unexpired term. Each nominee before appointment, shall furnish to the regents proof that he has received a degree in the veterinary medicine from registered veterinary medical school and that he has legally practised veterinary medicine in this state for at least five years. If no nominees are legally before them from the society, the regents may appoint from members in good standing in the veterinary profession without restriction. The regents may remove any examiner for misconduct, incapacity or neglect of duty.

§ 173 **Certificate of appointment; oath; powers.** Every veterinary medical examiner shall receive a certificate of appointment from the regents, and before beginning his term of office shall file with the secre-

tary of state the constitutional oath of office. The board, or any committee thereof, may take testimony and proofs concerning all matters within its jurisdiction. The board may, subject to the regents' approval, make all by-laws and rules not inconsistent with law needed in performing its duties, but no by-laws or rules by which more than a majority vote is required for any specified action by the board shall be amended, suspended or repealed by a smaller vote than that required for the action thereunder.

§ 174 **Expenses.** From the fees provided by this article the regents may pay all proper expenses incurred by its provisions, except compensation to veterinary medical examiners, and any surplus at the end of the academic year shall be apportioned among the members of the board pro rata according to the number of candidates whose answer papers have been marked by each.

§ 175 **Officers; meetings; quorum; committees.** The board shall annually elect from its members a president and secretary for the academic year, and shall hold one or more meetings each year pursuant to the call of the regents. At any meeting a majority shall constitute a quorum; but questions prepared by the board may be grouped and edited, or answer papers of candidates may be examined and marked by committees duly authorized by the board and by the regents.

§ 176 **Admission to examination.** The regents shall admit to examination any candidate who pays a fee of \$10 and submits satisfactory evidence, verified by oath if required, that he 1) is more than 21 years of age; 2) is of good, moral character; 3) has the general education required in all cases after July 1, 1897, preliminary to receiving a degree in veterinary medicine; 4) has studied veterinary medicine not less than three full years, including three satisfactory courses, in three different academic years, in the veterinary medical school registered as maintaining at the time a satisfactory standard; 5) has received a degree as veterinarian from some registered veterinary medical school. The degree in veterinary medicine shall not be conferred in this state before the candidate has filed with the institution conferring it, the certificate of the regents that three years before the date of the degree, or before or during his first year of veterinary medical study in this state, he has either graduated from a registered college or satisfactorily completed an academic course in a registered academy or high school; or has a preliminary education considered and accepted by the regents as fully equivalent; or has passed regents examinations equivalent to the minimum requirement in such preliminary education for candidates for medical or dental degrees in this state. Students who had matriculated in a veterinary medical school before Oct. 1, 1895, shall be exempted from this preliminary education requirement, provided the degree be conferred before July 1, 1898. The regents may, in their discretion, accept as the equivalent for any part of the third and fourth requirements, evidence of five or more years' reputable practice in veterinary medicine, provided that such substitution be specified in the license.

§ 177 **Questions.** Each member of the board shall submit to the regents, as required, lists of suitable questions for thorough examination in comparative anatomy, physiology and hygiene, in chemistry and in veterinary surgery, obstetrics, pathology and diagnosis and therapeutics, including practice and materia medica. From these lists the regents shall prepare question papers for all these subjects, which at any examinations shall be the same for all candidates.

§ 178 **Examinations and reports.** Examination for license shall be given in at least four convenient places in this state and at least four times annually, in accordance with the regents' rules, and shall be exclusively in writing and in English. Each examination shall be conducted by a regent examiner, who shall not be one of the veterinary medical examiners. At the close of each examination, the regents' examiner in charge shall deliver the questions and answer papers to the board, or to its duly authorized committee, and such board, without unnecessary delay, shall examine and mark the answers and transmit to the regents an official report, signed by its president and secretary, stating the standing of each candidate in each branch, his general average and whether the board recommends that a license be granted. Such report shall include the questions and answers and shall be filed in the public records of the University. If a candidate fails on his first examination, he may, after not less than six months' farther study, have a second examination without fee. If the failure is from illness or other cause satisfactory to the regents, they may waive the required six months' study.

§ 179 **Licenses.** On receiving from the state board an official report that an applicant has successfully passed the examination and is recommended for license, the regents shall issue to him, if in their judgment he is duly qualified therefor, a license to practise veterinary medicine. Every license shall be issued by the University under seal and shall be signed by each acting veterinary medical examiner of the board and by the officer of the University who approved the credential which admitted the candidate to examination, and shall state that the licensee has given satisfactory evidence of fitness as to age, character, preliminary and veterinary medical education and all other matters required by law, and that after full examination he has been found properly qualified to practise. Applicants examined and licensed before July 1, 1897, by other state examining boards registered by the regents as maintaining standards not lower than those provided by this article, and applicants who matriculate in a New York state veterinary medical school before July 1, 1896, and who receive the veterinary degree from a registered veterinary medical school before July 1, 1897, may without farther examination, on payment of \$10 to the regents, and on submitting such evidences as they may require, receive from them an indorsement of their license or diplomas conferring all rights and privileges of a regents license issued after examination. If any person whose registration is not legal or who is not registered because of some error, misunderstanding or unintentional

omission, shall submit satisfactory proof that he had all requirements prescribed by law at the time required for registration and was entitled to be legally registered, he may, on unanimous recommendation of the state board of veterinary medical examiners, receive from the regents under seal a certificate of the facts which may be registered by any county clerk and shall make valid the previous imperfect registration. Before any license is issued it shall be numbered and recorded in a book kept in the regents office and its number shall be noted in the license. This record shall be open to public inspection, and in all legal proceedings shall have the same weight as evidence that is given to a record of conveyance of land. [*As amended 1900, A. B. 567*]

§ 179a **Registry.** Every license to practise veterinary medicine shall, before the licensee begins practice thereunder, be registered in a book to be known as the Veterinary medical register, which shall be provided by and kept in the clerk's office of the county where such practice is to be carried on, with name, residence, place and date of birth, and source, number and date of its license to practise. Before registering, each licensee shall file, to be kept in a bound volume in the county clerk's office, an affidavit of the above facts, and also that he is the person named in such license, and had, before receiving the same, complied with all requisites as to attendance, terms and amount of study and examination required by law and the rules of the University as preliminary to the conferment thereof, and no money was paid for such license, except the regular fees, paid by all applicants therefor; that no fraud, misrepresentation or mistake in any material regard was employed by any one or incurred in order that such license should be conferred. Every license, or if lost, a copy thereof, legally certified so as to be admissible as evidence, or a duly attested transcript of the record of its conferment, shall, before registering, be exhibited to the county clerk, who, only in case it was issued or indorsed as a license under seal by the regents, shall indorse or stamp on it the date and his name preceded by the words. "registered as authority to practise veterinary medicine, in the clerk's office of — county." The clerk shall thereupon give to every veterinarian so registered a transcript of the entries in the register, with a certificate under seal that he has filed the prescribed affidavit. The licensee shall pay to the county clerk as a total fee of \$1 for registration, affidavit and certificate.

§179b **Registration in another county.** A practising veterinarian having registered a lawful authority to practise veterinary medicine in one county, and removing such practice or part thereof to another county, or regularly engaging in practice or opening an office in another county, shall show or send by registered mail to the clerk of such other county, his certificate of registration. If such certificate clearly shows that the original registration was of an authority issued under seal by the regents, or if the certificate itself is indorsed by the regents as entitled to registration, the clerk shall thereupon register the applicant in the latter county, on receipt of a fee of 25 cents, and shall stamp or indorse on such

certificate the date and his name, preceded by the words "registered also in ——— county" and return the certificate to the applicant.

§ 179c **Certificate and presumptive evidence; unauthorized registration and license prohibited.** Every unrevoked certificate and indorsement of registry, made as provided in this article, shall be presumptive evidence in all courts and places that the person named therein is legally registered. Hereafter no person shall register any authority to practise veterinary medicine unless it has been issued or indorsed as a license by the regents. No diploma or license conferred on a person not actually in attendance at the lectures, instructions and examinations of the school conferring the same, or not possessed at the time of its conferment of the requirements then demanded of veterinary medical students in this state as a condition of their being licensed so to practise, and no registration not in accordance with this article shall be lawful authority to practise veterinary medicine, nor shall the degree of doctor of veterinary medicine be conferred *causa honoris* or *ad eundum*, nor if previously conferred shall it be a qualification for such practice.

§ 179d **Construction of this article.** This article shall not be construed to affect commissioned veterinary medical officers serving in the United States army, or in the United States bureau of animal industry while so commissioned; nor any person for giving gratuitous services in case of emergency; or any lawfully qualified veterinarian in other states or countries meeting legally registered veterinarians in this state in consultation; or any veterinarian residing on a border of a neighboring state and duly authorized under the laws thereof to practise veterinarian medicine therein, whose practice extends into this state, and who does not open an office or appoint a place to meet patients or receive calls within this state; or any veterinarian duly registered in one county called to attend isolated cases in another county, but not residing or habitually practising therein. This article shall be construed to repeal all acts or parts of acts authorizing conferment of any degree in veterinary medicine, *causa honoris* or *ad eundum*, or otherwise, than on students duly graduated after satisfactory completion of a preliminary and veterinary medical course, not less than that required by this article, as a condition of license.

§ 179e **Penalties and their collection.** Every person who shall practise veterinary medicine within this state without lawful registration or in violation of any provision of this article shall forfeit to the county wherein such persons shall so practise, or in which any violation shall be committed, \$50 for every such violation, and for every day of such unlawful practice, and any incorporated veterinary medical society of the state or any county veterinary medical society of such county entitled to representation in a state society, may bring an action in the name of such county for the collection of such penalties, and the expense incurred by such society in such prosecution, including necessary counsel fees, may be retained by such society out of the penalties so collected, and the residue, if any, shall be paid into the county treasury. Any person who shall

practise veterinary medicine under a false or assumed name or who shall falsely personate another practitioner of a like or different name, shall be guilty of a felony; and any person guilty of violating any of the other provisions of this act, not otherwise specifically punished herein, or who shall buy, sell or fraudulently obtain any veterinary medical diploma, license, record or registration, or who shall aid or abet such buying, selling or fraudulently obtaining, or who shall practise veterinary medicine under the cover of a diploma, or license illegally obtained, or signed or issued unlawfully or under fraudulent representation, or mistake of fact in material regard, or who, after conviction of a felony, shall attempt to practise veterinary medicine, and any person who shall, without having been authorized so to do legally, append any veterinary title to his or her name, or shall assume or advertise any veterinary title in such a manner as to convey the impression that he is a lawful practitioner of veterinary medicine or any of its branches, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not less than \$250 or imprisonment for six months for the first offense, and on conviction of a subsequent offense by a fine of not less than \$500 or imprisonment for not less than one year, or by both fine and imprisonment.

§179f **Misconduct of veterinary surgeons.** A person who presents to a county clerk for registration as a practitioner of veterinary medicine or surgery any diploma or certificate fraudulently obtained or practises veterinary medicine and surgery without complying with or contrary to law, is guilty of a misdemeanor. reputable freeholders in his locality, or upon presentation of a diploma from a legally authorized veterinary school, college or university, if made before July 1, 1895.

§ 1616 **Board of examiners; appointment; term.** The governor shall appoint a board of examiners within 30 days after the passage of this article to be known as the state board of veterinary medical examiners. Such board shall consist of three practising veterinarians, who shall each be the holder of a diploma granted by a legally authorized veterinary school, college or university, who shall hold office, one for one year, one for two years, and one for three years, after such appointment, or until their successors are appointed. Thereafter, each year, the governor shall appoint one member of said board to fill the vacancy occasioned by the expiration of the term of office of those previously appointed, and is further authorized to fill such vacancies as may occur.

The board shall issue a certificate of qualification to all applicants who shall pass the required examination, and who shall be citizens of the United States, or shall have legally declared their intention to become such, and to all applicants who are eligible to registration under § 1615, signed by the president and secretary of the board. The president shall upon payment of \$5, if satisfied that the applicant is qualified and a suitable person, issue to him a permit to practise until the next meeting of the board, and such permit shall have the same force as a certificate from the board, but shall expire upon the adjournment of the next meeting of the board of examiners.

§ 1619 **Diplomas and certificates.** Persons presenting diplomas or certificates for registration, shall pay to the treasurer of said board a fee of \$10 in advance; and the fees received by said board shall be paid over to the state treasurer within 30 days after receipt of same. Said fees shall

constitute a special fund for the payment of the expenses of said board of examiners. Each member of said board shall receive from the state treasury all necessary traveling expenses actually incurred in attending such meetings. The secretary of the board shall certify to the state auditor after each meeting of the board the amount due each member for necessary expenses in attending such meetings, and other necessary expenses of the board. The state auditor shall thereupon issue his warrant on the state treasurer for such sum provided there has been a sufficient amount paid into the treasury in fees to redeem said warrants; but if there is not an amount equal to said certified expenses to the credit of such fund, he shall issue his warrant for the amount in the said special fund and deficiencies in the payment of said expenses may be made up from subsequent receipts.

§ 1620 **Misdemeanor to practise, etc., when.** Any person who either: 1) practises veterinary medicine, surgery or dentistry, in this state without compliance with the provisions of this article; or, 2) wilfully and falsely claims or pretends to have or hold a certificate of registration issued by such board; or, 3) wilfully and falsely, with intent to deceive the public, claims or pretends to be a graduate of, or to hold a diploma granted by a legally authorized veterinary school, college or university, is guilty of a misdemeanor, and upon conviction is punishable by a fine of not less than [\$] 50 nor more than \$100, and in case of non-payment of such fine, the person so offending shall be liable to imprisonment for a period not exceeding six months; provided, that the provisions of this section do not apply to persons practising castration. All fines received under this article shall be paid into the common school fund of the county in which such conviction takes place. [*As amended 1899, ch. 168*]

§ 1621 **Examination.** All persons commencing the practice of veterinary medicine, surgery, or dentistry in this state after the passage and approval of this act, shall be graduates of a legally authorized veterinary school, college or university, and shall subject themselves to such examination as the board may require.

§ 1622 **Certificates recorded.** Every person holding a certificate from the board of examiners shall have it recorded in the office of the register of deeds in the county in which he resides, within 30 days after the date of said certificate, and the record shall be indorsed thereon. Any person removing to another county to practise shall record within 30 days the certificate in a like manner in the county to which he removes, and the holder of the certificate shall pay to the register of deeds a fee of \$1 for making the record.

The candidate, if unsuccessful, shall not be eligible to another examination until the expiration of one year thereafter.

§ 4412-8 **Fee for examination.** Candidates shall present themselves for examination at the regular meetings of the board and shall pay for each examination the sum of \$5, which shall accompany their application in writing, and be paid to the secretary of the board previous to the regular meeting of the board. One half of the \$5 shall be returned if the candidate fails in the examination or if a diploma is accepted in lieu of an examination.

§ 4412-9 **Certificate on diploma.** The board may accept a properly issued diploma in lieu of an examination; but such a diploma shall be accepted only if it has been issued by a reputable veterinary school or college, that requires a course of study and gives instruction in all the various branches of veterinary science.

The appointments of successors to those members whose term of office will expire on the first Monday in September of each year shall be made by the governor during the month of June of such year upon the same conditions and requirements as hereinbefore specified. Every person who shall be appointed to serve on said board shall receive a certificate of appointment from the secretary of the commonwealth. The governor shall fill vacancies from death or otherwise for unexpired terms of said examiners, and may remove any member of said board for continued neglect of the duties required by this act, for incompetence or for unprofessional or dishonorable conduct.

§ 4 Expenses and compensation. From the fees provided for by this act, the board may pay, not to exceed said income, all proper expenses incurred by its provisions, and if any surplus above said expenses shall remain, such examiners shall receive a reasonable remuneration from the said surplus for their work.

§ 5 Organization; meetings. The first meeting of the examining board shall be held on the first Monday in September, 1895, suitable notice in the usual form being given with the notice of their appointment by the secretary of the commonwealth to each of the members thereof specifying the time and place of meeting. For the purpose of examining applicants for license, said board of veterinary medical examiners shall hold two or more stated or special meetings in each year, due notice of which shall be made public at such time and places as they may determine. At said stated or special meetings a majority of the members of the board shall constitute a quorum thereof, but the examination may be conducted by a committee of one or more members duly authorized by said board.

§ 6 Diploma; examination; subjects. The said board of veterinary medical examiners shall examine all diplomas as to their genuineness, and each applicant for a license shall submit to a theoretical and practical examination, said examination to be written, oral or both. Such examinations shall include the following subjects: veterinary anatomy, surgery, practice of medicine, obstetrics, pathology, chemistry, veterinary diagnosis, materia medica, therapeutics, physiology, zootechnics, sanitary medicine and meat and milk inspection.

Such license, issued pursuant to this act, shall be subscribed by the officers of the board of veterinary medical examiners. It also shall have affixed to it, by the person authorized to affix the same, the seal of this commonwealth. Before said license shall be issued, it shall be recorded in a book to be kept in the office which said board shall establish, for the purpose of carrying out the provisions of this act; and the number of this book and the page therein containing said recorded copy, shall be noted upon the face of said license. From and after the first Monday in September, 1895, any person not heretofore authorized to practise veterinary medicine and surgery in this state, and desiring to enter upon such practice, may deliver to the secretary of the veterinary medical board, upon the payment of a fee of \$10, a written application for license, together with satisfactory proof that the applicant is more than 21 years of age, is of good moral character, has obtained a competent common school education, and has received a diploma conferring the degree of veterinary medicine from some legally incorporated veterinary college of the United States, or a diploma or license conferring the full right to practise all the branches of veterinary surgery in some foreign country; applicants who have received their degree in veterinary medicine after the first day of July, 1896, must have pursued the study of veterinary medicine for at least three years, including three regular courses of lectures of at least six months each in different years, in some legally incorporated veterinary college or colleges, prior to the granting of said diploma or foreign license. Such proof shall be made, if required, upon affidavit. Upon making the said payment and exhibiting the before-named proof, the examining board, if satisfied with the same, shall issue to such applicant an order for examination. In case of failure at any such examination, the candidate, after the expiration of six months and within two years, shall have the privilege of a second examination by the same board to which application was first made, without the payment of an additional fee; and it is further provided that applicants examined and licensed by state boards of veterinary medical examiners of other states, on payment of a fee of \$10 to the examining board, and on filing in the office of said board a copy of said license, certified by the affidavit of the president or secretary of the board of such other state, showing also that the standard of examinations and other requirements adopted by that state board of veterinary medical examiners is substantially the same as that provided for by this act, shall, without further examination, receive a license conferring upon the holder thereof all the rights and privileges provided by § 8 and 9 of this act.

And nothing in this act shall be construed to prohibit the practice of veterinary medicine and surgery within this commonwealth by any practitioner who shall have been duly registered before the first Monday in September, 1895, and one such registry shall be sufficient warrant to practise veterinary medicine and surgery in any county in this commonwealth. Nothing in this act shall apply to persons who castrate domestic animals, or to persons gratuitously treating diseased animals.

Laws 1895-96, ch. 509

§ 1 **Who may practise.** That from and after the first day of May, 1896, the following persons and no others shall be permitted to practise veterinary medicine or surgery in this state: 1) all persons who prior to the first day of May, 1896, are practising veterinary medicine or surgery in this state: provided that before the first day of November, 1896, they shall apply in writing to the state board of veterinary examiners created by this act and furnish satisfactory proof that they have been in practice in this state prior to the first day of May, 1896. The state board of veterinary examiners shall thereupon issue to such person a certificate, without fee, allowing them to continue in practice without having to undergo an examination as provided by § 7 of this act; 2) all persons who shall hereafter receive certificates from the state board of veterinary examiners of this state as provided by § 7 of this act, and who shall also in all other respects have complied with the provisions of the same.

§ 2 **After May 1896.** All persons who begin the practice of veterinary medicine or surgery in this state on or after the first day of May, 1896, and all persons who neglect to comply with the requirements of the first clause of § 1 of this act shall comply with the provisions of § 7 before a certificate to practise shall be issued to them.

§ 3 **Practice of veterinary medicine defined; not to apply.** Any person shall be regarded as practising veterinary medicine or surgery, within the meaning of this act, who shall profess publicly to be a veterinary surgeon and offer for practice as such, or who shall prescribe for sick

domestic animals, needing medical or surgical aid, and shall charge and receive therefor money or other compensation, directly or indirectly. But nothing in this act shall apply to residents of this state who confine their practice to the castration, spaying or dehorning of live stock, nor shall it prevent any one, who does not claim to be a veterinarian or veterinary surgeon, from prescribing for live stock. [*As amended 1897-98, ch. 565*]

§ 4 **Board of veterinary examiners; term.** There shall be for this a state board of veterinary examiners, consisting of five members, whose term of office shall be four years, or until their successors are appointed and qualified. The term of office of the board first appointed after this act takes effect shall commence on the first day of May, 1896.

§ 5 **Appointment.** The said board shall consist of men learned in veterinary medicine and surgery, and shall be appointed by the governor on or before the first day of May, 1896, and every fourth year thereafter, from a list of 10 names to be recommended by the Virginia state veterinary medical association every four years. Vacancies occurring in such board for unexpired terms shall be filled by the governor by selection from the five names not appointed from 10 last recommended by the association. Such recommendation shall be by vote of a majority present at some meeting of the said association and shall be certified to the governor by the president and secretary of said association; provided if said association fail to make such recommendations prior to the time of appointment the governor shall appoint such board, either in whole or in part, without regard to such recommendations. If any of said examiners shall cease to reside in this state his office shall be deemed vacant.

§ 6 **Oath; organization; meetings.** The members of said board shall qualify by taking the usual oath of office before the county or corporation court of the county or corporation in which they respectively reside, or before the judge of such court in vacation. The officers of said board shall be a president, vice-president and secretary (who shall also act as treasurer), said officers to be members of and selected by the board. Regular meetings of the board shall be held at such times and places as the board may prescribe, and special meetings may be held upon the call of the president and any two members, but there shall not be less than one regular meeting each year. Three members of the board shall constitute a quorum. The board may prescribe rules, regulations and by-laws for its own proceedings and government, and for the examination by its members of candidates for the practice of veterinary medicine and surgery.

§ 7 **Certificate on examination.** It shall be the duty of said board, at any of its meetings, to examine all persons making application to them who shall desire to commence the practice of veterinary medicine or surgery in this state, and who shall not, by the provisions of this act, be exempt from such examination; and when an applicant shall have passed an examination satisfactory as to efficiency before the board in session, the president thereof shall grant to such applicant a certificate

to that effect. A fee of \$5 shall be paid to said board, through such officers or members as it may designate, by each applicant before such examination is held. In case any applicant shall fail to pass a satisfactory examination he shall not be permitted to stand any further examination within the next six months thereafter, or until the next meeting of said board, nor shall he have again to pay the fee prescribed as aforesaid: provided, however, no applicant shall be rejected upon his examination on account of his adherence to any particular school of medicine or system of practice, nor on account of his views as to the method of treatment and cure of disease; and provided, further, that when, in the opinion of the president of the board, any applicant has been prevented by good cause from appearing before the board, the president of the board shall appoint a committee of three members who shall examine such applicant, and may, if they see fit, grant him a certificate, which shall have the same force and effect as though granted him by the full board.

§ 8 Expenses and compensation of board. The fund realized from the fees aforesaid shall be applied by the board to the payment of its expenses and to making a reasonable compensation to the president and secretary.

§ 9 Register. BUSINESS EDUCATION

NEW YORK

To elevate the standard of business education in New York and to establish a uniform test for the measure of such education, state business credentials will be granted on examinations conducted by the University. This action was taken after a conference between officers of the University and a committee appointed at the national convention of business educators held in Buffalo, July 1896, it being the unanimous opinion of the conference that the offer of official recognition would encourage and dignify sound business education.

Business credentials. Four credentials are offered as follows:

- | | |
|-------------------------------|-----------------------------------|
| 1 State business diploma | 3 State business certificate |
| 2 State stenographers diploma | 4 State stenographers certificate |

Requirements. Diplomas are issued only to those who have a preliminary education equivalent to graduation at a registered high school. If the course taken has not included United States history, civics and economics, regents examinations in these subjects must be passed. Certificates are issued to those who have not this preliminary general education.

State business diploma. To obtain the state business diploma, candidates having the required preliminaries must be certified as having completed a full one year course in a registered business school, or a registered business course of four years in a registered ¹high school, and must pass regents business examinations in

Advanced bookkeeping	Business arithmetic

State stenographers diploma. To obtain the state stenographers diploma, candidates having the required preliminary education must be certified as having completed a full one year course in a registered business school, or a registered business course of four years in a registered ¹high school, and must pass with honor (90% and upward) the 100 word test in stenography (academic examination) and the examinations in business English and in type-writing including the usual office work of an amanuensis.

¹ Candidates for a diploma who take the four years business course in a high school obtain the required preliminaries as a part of that course.

² Candidates for the business diploma who so elect may offer the state stenographers credential as a substitute for the work in commercial geography and history of commerce.

Certificates. To obtain the state business certificate or the state stenographers certificate, the candidate is required to pass only the examinations mentioned above under the title of the corresponding diploma.

Examinations. Academic examinations in stenography, United States history, civics and economics are held four times a year (January, March, June, September) at the places mentioned below and those occurring in January, March and June are held also at upward of 640 high schools and academies of the state (*see* K 5 p. 32). Candidates for the state business and state stenographers credentials are admitted to any of these examinations; but those not attending schools in which regents examinations are held should send notice to the University at least 10 days in advance, stating in what studies they wished to be examined, that desk room may be provided at the most convenient place. Two business examinations will be offered each year. The next examination will be in June 1900 and there will be examinations each January and June thereafter at New York, Albany, Syracuse, Buffalo, and in other places in the state where there are 10 or more candidates. Legislative information, 4) title of the law-making body, 5) frequency of its sessions, 6) time of next meeting, 7) place, 8) date of the last statute or amendment published, 9) date of the last statute consulted.

In editing and revising the statutes care has been taken to omit all irrelevant matter and all inoperative by reason of time limit or amendments, to preserve the phraseology and punctuation and to give the sources of information. Minor changes involving paragraphing, numbering, capitalization and spelling have been made in accord with the editing rules of the University when the change affected the significance of the law in no particular. New York. The following preparatory course for admission to medical schools for recommendation to the schools of New York state has been carefully revised since its publication in the Director's *Report of the high school department*, 1899, University of the State of New York.

The subjects recommended to be required in all cases for admission to medical schools are printed in italics; those in Roman are recommended to balance the course and to make room for electives that will secure adequate preparation in culture subjects. The University can register this medical preparatory course and issue a medical student diploma to all students that secure 48 counts in the required subjects and electives distributed in accord with the requirements of the academic diploma, as set forth in the syllabus for 1900.

Negotiations are pending to secure from the General medical council of Great Britain the registration of medical and dental students in the state of New York. If this can be consummated, the completion of the 11th year of this recommended medical course will excuse the student from the preliminary examinations of the General medical council of Great Britain. If all the subjects included in the preliminary examination are passed at the same time, viz,

English language, including grammar and composition.

Latin, including grammar, translation from specified authors and easy passages not taken from such authors

Mathematics, arithmetic, algebra, geometry

Optional, Greek, German or any other modern language the student will be eligible to registration by the General medical council.

The completion of the 12th year will prepare the student to enter the first professional examination and the passing of
part 1, chemistry and physics
part 3, elementary biology

will complete the first professional year. The four year courses of our medical schools will cover the remaining four professional years and will prepare for the second and third professional examinations.

By registering during the third high school year New York medical students could meet the English requirements at the same time that they met the New York state requirements.

^a An approved laboratory course will be given 2 counts.

This course also makes provision for students in dentistry, veterinary medicine and pharmacy both by its fundamental and essential subjects, and will defer to the last year the necessity of choosing a professional course.

Veterinary medicine

The services rendered this profession in the United States by Dr Alexander F. Liautard warrant the following outline by Dean Faneuil D. Weisse, M. D., New York college of dentistry, Mar. 31, 1900.

Alexander F. Liautard, born in Paris, Feb. 15, 1835; graduated from the veterinary school of Alfort, in 1856; veterinary surgeon in the French army three years; a practising veterinary surgeon in New York since 1860; received the degree of M. D. in 1864.

The same year when veterinary medicine as a profession had no existence in the United States, the New York college of veterinary surgeons was organized, and in 1875 the American veterinary college. Dr Liautard was continuously dean, professor of anatomy and operative surgery and director of the hospital in the former from 1864 to 1875, in the latter from 1875 to 1899. He successively provided the trustees of each school with a building fitted for occupancy, and his private hospital together with the free hospital clinics established and carried on by him, furnished the students practical instruction.

Dr Liautard is the author of many works on veterinary medicine. He established, and has carried forward, as editor, the *American veterinary review*, now in its 24th year.

Active in the organization of veterinary societies, local and national, his professional labors have been conspicuously recognized, by his election to active and honorary membership and offices in both veterinary and medical societies and associations in this country and abroad.

The hundreds of graduates of the American veterinary college, are the living witnesses of the results of his continuous singleness of purpose and untiring energy in contributing his time,

his means and his best efforts as teacher, author, editor and organizer to the development, in the United States, of veterinary medicine as a profession.

Conclusion. In concluding the work on the first series of bulletins, *Professional education in the United States* a short review may prove interesting. Active work began in May 1898, when letters were addressed to the medical authorities of the United States and Canada. Between that date and August information covering the other professions was requested from executive officers throughout the United States and Canada. During August and September the same information was sought through foreign correspondents.

During October 1898, the professional schools of the United States were asked for definite information concerning their courses and facilities, and foreign governments for official information.

Mar. 16, 1899, Dr Bayard Holmes, secretary of the Association of American medical colleges, asked that an abstract be made from the announcements of the medical schools of the United States to show whether they were living up to the standard of the college association, and on the same date Dr Nicholas Murray Butler, in behalf of the educational exhibit at the Paris exposition, asked the director of the college department to prepare a monograph on professional education in the United States. It seemed wise under the circumstances to change the plan and scope of the work and to issue the register in two series: 1) Professional education in the United States, and 2) Professional education in foreign countries.

During April and May 1899, the abstracts were made for Dr Holmes and the *Condition of medical colleges in the United States* was printed in the bulletin of the American academy of medicine for June. During April, May and June 1899, statements from the statutes and requirements of the professional schools were submitted to the executive officers for revision and correction. June 23, replies had been received from 95% of the letters sent throughout the United States and Canada and from at least 75% of those sent to foreign countries.

The work on the monograph was completed in October and the bulletins of the first series on professional education, seven in number, viz, 1) General, 2) Theology, 3) Law, 4) Medicine, 5) Dentistry, 6) Pharmacy, 7) Veterinary medicine are now complete.

The second series of professional education in foreign countries is in course of preparation. At the meeting of the regents held Mar. 29, 1900 it was

Voted, That the permission to make his vacation cumulative, as accorded by the secretary, be confirmed in order to afford Dr Taylor an opportunity to spend six months in Europe from May 1 to collect material for the proposed series of bulletins on *Professional education in foreign countries*.

Special attention is called to the acknowledgment card accompanying the bulletins and bound volume, which will serve the double purpose of securing a live correspondence list and the latest official information.
